## LETTER OF TRANSMITTAL

---

Department of Public Instruction

Tallahassee, Florida, December 3, 1934.

To His Excellency,  
David Sholtz,  
Governor of Florida.

Sir:

In compliance with Section 27, Article IV, of the Constitution of Florida, I have the honor to submit herewith the Biennial Report of the Department of Public Instruction for the two years beginning July 1, 1932, and ending June 30, 1934.

Yours respectfully,

W. S. CAWTHON,  
State Superintendent of Public Instruction.

**IMPERATIVE SCHOOL NEEDS**

Florida needs:

1. Comfortable surroundings in a good school for every child, involving a state building fund to be matched by local and county funds.
2. A well trained teacher for every classroom.
3. A comfortable and safe bus for every child transported.
4. Better attendance through interest in better schools.
5. County supervision of instruction, especially in rural schools.
6. Sensible consolidation wherever practicable.
7. Honest and accurate records and reports from every teacher.
8. The same emphasis on training for the boy who would enter a trade as for the one who would enter a profession.
9. Such good schools and such wholesome administration of schools as to compel public confidence and respect.
10. Maintenance of the county unit system for the operation of our schools.
11. Budgeting for education—including budgeting to pay back debts—and a strict compliance with the budget.
12. Abolition of special tax school districts except for payment of bonded indebtedness. (A district to cease to exist when all its bonds are retired.)
13. A proper balance between State and county responsibility for education.
14. A stronger realization that the schools exist for the good of the children, and not for the distribution of jobs.
15. An adequate health program in every school.
16. A new school code that will place Florida in the front rank of progressive states.

Before an effective new school code can be made operative it will be necessary to make certain changes in the State Constitution as follows:

- (1) Eliminate from Sections 20 and 25 of Article IV, and Section 2, Article XII, all reference to the State Superintendent of Public Instruction. Also eliminate Section 3, Article XII, which provides for a State Board of Education.
- (2) Change Section 8, Article XII, to read as follows:  
Each county shall be required to assess and collect

annually for the support of the public free schools therein, a tax of not less than five (5) mills, nor more than twenty (20) mills on the dollar on all taxable property in the same.

- (3) Eliminate Sections 10 and 11 of Article XII which provide for the establishment of special tax school districts.
- (4) To Section 17, Article XII, add the provision that no more bonds are to be voted by a special tax school district, and that after any bonded indebtedness and interest on the same for any given special tax school district shall have been paid in full that district is to be abolished.
- (5) Eliminate reference to District School Funds in Section 13, Article XII.
- (6) From Section 6, Article VIII, eliminate all reference to the County Superintendent of Public Instruction.

### PROPOSED NEW SCHOOL PLAN

1. Provide by law for a State Board of Education which shall:

- (a) Be composed of seven members appointed by the Governor for seven years each, and from the various sections of the State. Provided that the first Board appointed shall determine by lot which member shall serve one year, two years, etc., to seven years, for the first seven-year period.
- (b) Serve without pay but may be remunerated for actual expenses incurred in the discharge of their duties.
- (c) Have broad general powers in setting up and operating a State Free School system.
- (d) Make regulations having the force of law unless in conflict with existing laws.
- (e) Appoint a State Superintendent and upon his recommendation all necessary assistants and employes to serve in the State Department of Public Instruction, and fix the salaries for the same.

2. The State Superintendent of Public Instruction shall:

- (a) Be selected without reference to his place of residence.

## DEPARTMENT OF PUBLIC INSTRUCTION

- (b) Have a minimum qualification of the Master's Degree from an accredited institution of higher learning.
- (c) Have done special work in the field of education.
- (d) Have had not less than five years experience in public school administration.
- (e) Be administrative officer for the State Board of Education.
- (f) Recommend for appointment all assistants for the State Department of Public Instruction.
- (g) Have entire charge of the administration of the State School System.

3. Amend Section 15, Chapter 3872, Acts of 1889, to provide that the County Board of Public Instruction shall:

- (a) Consist of five members elected from the county at large and to serve for four years each. The first Board organized under this law shall have three members elected for two years and two for four years, and thereafter at alternate two year periods, at the general election, first three and then two members shall be elected for four year periods.
- (b) Serve without pay, but may be reimbursed for actual expenses incurred in attendance upon meetings of the Board.
- (c) Have broad general powers having to do with the needs of the county school system.
- (d) Upon the recommendation of the State Superintendent of Public Instruction appoint a County Superintendent of Public Instruction.
- (e) Employ upon the recommendation of the County Superintendent all necessary assistants for the county school system, including the teachers for the various schools of the county.

4. The County Superintendent of Public Instruction shall:

- (a) Be selected irrespective of his place of residence.
- (b) Be a graduate of an accredited college and the holder of the bachelor's degree from said college.
- (c) Have had not less than five years experience in actual school administration.

- (d) Receive a salary in accordance with a scale of salaries adopted by the State Board of Education for County Superintendents of Public Instruction; provided, that 50% of the said salary shall be paid from State funds.
- (e) Be the administrative officer for the County Board of Public Instruction.
- (f) Be solely responsible under the County Board for the successful administration of the county schools.

### PROPOSED CHANGES IN EXISTING LAWS

1. Abolish Section 11, Chapter 3872, Acts of 1889, having to do with county line pupils.

2. Change Paragraph 9, Chapter 16,170, Acts of 1933, in such way as to give the State Board of Education authority to establish a **minimum salary schedule** instead of a **maximum** schedule.

3. Change item (f) Paragraph 3, Section 44, Chapter 16,170, Acts of 1933 to set July 15 as the date upon which county school budgets shall be due.

4. Change Section 43, Chapter 14,829, Acts of 1931, as follows:

- (a) Change Paragraph 6 in such manner as to allow **salaries paid for the preceding year** to be used as bases for computation of instruction units rather than **salaries to be paid for the current year**.
- (b) Change Paragraph 3, item (a) to allow not more than one unit, under any circumstances, for a one-teacher school.
- (c) Make necessary consolidation of schools a prerequisite for allotment of State funds on account of the average daily attendance of pupils in schools that should be consolidated.
- (d) Provide for withholding State funds for schools operated in violation of the three-mile limit law.
- (e) Provide for withholding State funds from schools employing teachers who hold only temporary certificates or no certificates at all.
- (f) Provide for withholding State funds from schools not having safe, comfortable buildings, sanitary toilets, a good water supply, and a minimum amount of necessary equipment.

## DEPARTMENT OF PUBLIC INSTRUCTION

- (g) Provide a method of changing ratios to be used in determination of instruction units as new conditions in the State arise.
5. Provide for discontinuing the granting of teachers certificates upon examination, and set up a method of transition to certification upon training only.

## PROPOSED NEW LAWS

1. Make possible the employment of helping teachers in the various counties, a part of the salary of such teachers to be paid from State funds.
2. Make possible the extension of library service to all parts of the various counties, especially to rural schools.
3. Enact a just and fair teacher's retirement law.
4. Provide that the School Building Division of the State Department of Public Instruction now being maintained by the General Education Board be taken over by the State and maintained from State funds.

## STATE FUNDS FOR SCHOOLS

Provide stable and dependable sources of income for funds to be distributed to the counties upon the instruction unit basis. As far as humanly possible provide for **certainty** of school revenues with respect to both amounts and to the **times** at which said amounts will be available. Whatever the State provides should be certain of payment in ten **equal** monthly distributions, October to July both inclusive and should be applied solely on teachers' salaries.

## **REPORTS OF THE STATE SUPERVISORY STAFF**

Chapters II-IX, both inclusive, contain the reports for the biennium of the Directors of: Instruction, School Finance, School Building Service; and Supervisors of: Negro Schools, Trade and Industrial Education, Agricultural Education, Home Economics Education, and Vocational Rehabilitation.

## CHAPTER II

---

### INSTRUCTION

#### Creation of the Division

Chapter 16170, Acts of 1933, abolished in the State Department of Public Instruction the positions of State Supervisor of High Schools, State Supervisor of Elementary Schools, State Supervisor of Physical and Health Education, the two positions of Rural School Inspectors, and the position of Director of Buildings and Building Standards. It also placed the administration of the Teachers' Salary Fund, created by this chapter, and the transportation of public school pupils under the supervision of the State Department of Public Instruction. This greatly increased the responsibilities of the State Department, but did not provide funds sufficient for the creation of but two positions to replace those abolished.

The State Board of Education was given by the law mentioned above the authority "to employ such subordinate assistants as the State Superintendent may recommend, and as said Board of Education shall find necessary, to serve as assistants to the State Superintendent of Public Instruction . . . and upon the recommendation of the State Superintendent to provide for and fix the duties and compensation of such assistants to the State Superintendent of Public Instruction." Under this authority the State Board of Education created the positions of State Director of School Finance and State Director of Instruction.

Since the duties assigned to the Director of School Finance were largely new duties, it fell to the lot of the Director of Instruction to assume the duties that formerly belonged to the Supervisors of High Schools and Elementary schools and the two Rural School Inspectors.

The amount of work entailed in connection with the accreditation of schools has materially increased due to the fact that many more schools request this service than formerly. There were in 1933-34 864 schools (high schools

## DEPARTMENT OF PUBLIC INSTRUCTION

and elementary schools combined) which applied to the State Department of Public Instruction for accreditation.

**Summary of Major Activities**

During the biennium the State Director of Instruction has engaged in the major activities listed below.

1. Directing the work in connection with the accreditation of 268 high schools in 1932-33, and checking reports of 28 others not accredited; doing the same in 1933-34 for 287 high schools—242 of which were accredited, and 577 elementary schools—464 of which were accredited.

2. Editing, making arrangements for printing, and reading proof on the Course of Study for Florida Elementary Schools and the Social Studies Course of Study for Florida High Schools.

3. Acting as State Director of Relief Education during the school year 1933-34 in connection with which six plans for the six types of Emergency Relief Education were prepared, and the certification of thousands of relief teachers were checked for the F. E. R. A. office in Jacksonville.

4. The Director of Instruction also served on a committee to prepare a uniform system of accounts for the offices of the County Superintendents and to revise the annual reports of the County Superintendents to the State Superintendent.

5. Some work was done in inspecting school busses and a complete bus route survey of two counties was made.

**High School Graduates Going to College**

So much has been said in the press and out about the percentage of high school graduates that go to college that it was decided to bring these figures up to date. One hundred and eighty white senior high schools in Florida, whose principals kept accurate enough records to report on these matters, graduated in 1933, 2883 boys and 3624 girls, a total of 6455 graduates. Of these graduates 778 boys and 1578 girls went to college in 1933-34. Thus it is seen that 27% of the boys and 22% of the girls who graduated from high schools for whites in 1933 went to

college during the school year 1933-34—an average for both sexes of 25.6%.

In the same year, 46 out of 102, or 45% of the negro boys who graduated from high schools applying for accreditation went to college, and 77 out of 181, or 42% of the negro girls who graduated from high schools applying for accreditation went to college.

These percentages are probably a little below normal, due to adverse financial conditions which kept a number of high school graduates out of college for the school year 1933-34. The figures for 1934-35, when available, will probably show a higher percentage. In 1928, it was found that 37% of the girls and 47% of the boys, who graduated from high school, went to college—an average for both sexes of 42%—while in 1922-23, 49% of the graduates of Florida high schools went to college.

Statistics of the Office of Education several years ago showed that of 1000 students who entered the freshman classes of the colleges in the United States only 342, or 34.2% ever completed the course and secured degrees.

These figures would indicate that out of those pupils who graduate from high school in Florida not over 10 to 15 per cent at the present time may reasonably be expected to complete a college education. It would seem then unwise to make the criterion of college entrance requirements the goal of a high school education.

### **The High School Post Graduate Problem**

There have perhaps always been a few high school graduates that for one reason or another went back to high school after graduation to take additional subjects. During the period of the depression it was to be expected that this number would materially increase, due to the fact that more parents were unable to send their children to college, and many of those high school graduates who did not intend to enter college could not find employment.

When a reprint of the application blanks for accreditation of high schools was made in the summer of 1933, an item asking for the number of post graduates was included on this blank. Of the 205 senior high schools applying to the State Department of Public Instruction for accreditation, 74 reported some post graduate pupils.

The range was from one to 49 such students. There were reported a total of 452 post graduate pupils enrolled in these 74 schools, 159 of these being boys and 293 girls. There are in all probability a good many more than reported, for many principals did not fill out the blank at all, among these being the largest high schools in the state; such as, Andrew Jackson and Lee in Jacksonville, Miami and Miami Edison, Plant and Hillsborough in Tampa, and St. Petersburg High School.

If 452 is the correct number of high school post graduates in the state, it would seem that the post graduate problem is not acute enough in Florida to demand consideration by the state authorities.

### Growth of School Enrollment

It is of interest to note the tremendous increase in high school enrollment since statistics on this enrollment have been kept in the office of the State Superintendent. Below a small table is given showing this increase by five year periods and for the school year 1933-34:

**Pupils in Grades 9-12 in Florida High Schools**

1902- 1910	1914- 1915	1919- 1920	1924- 1925	1929- 1930	1932- 1933
3,046	5,149	12,195	25,708	48,592	55,796

It is interesting to note that the enrollment in these high schools increased over 1700% from 1909-10 to 1933-34. It more than doubled between 1914-15 and 1919-20, and between 1924-25 and 1932-33. This increased enrollment in the most expensive division of the public school, in part at least, accounts for the increased cost of education.

The enrollment in grade 1-12 of Florida public schools in 1909-10 was 146,721; in 1932-33 it was 374,915, an increase of 155.5%. By comparing this increase with the 1731.8% increase in the high school grades this gives some concept of the fact that the demand for a high school education has had a startling increase in the past two decades.

### Recommendations

1. That Chapter 9134, Acts of 1923, providing for scholarships at each of the two State Institutions of Higher Learning, be repealed; or so amended as to place the responsibility for the selection of recipients of these scholarship upon the institution attended by the recipient, and that the requirements as to which college the recipient shall attend be rescinded and the obligation to teach or repay the scholarship be rescinded. This last named requirement has not worked out satisfactorily, as the notes given by minors cannot be legally collected. The result has been that most of these notes have never been paid.

2. That the certificate laws be so revised as to discontinue the issuing of third and second grade and professional certificates altogether after July 1, 1935; that high school graduation be made a prerequisite for examination for the first grade certificate after July 1, 1935, and the completion of thirty semester-hours college credit be made the prerequisite for examination for the first grade certificate after July 1, 1937; and that examination for the first grade certificate be discontinued after July 1, 1940.

3. I should like to endorse the recommendations made by the State Superintendent in another part of the biennial report of the department.

### Statistical Tables

On the pages following are given classified lists of accredited high schools and accredited elementary schools for the school years 1932-33 and 1933-34 and classified lists of unaccredited high schools that applied for accreditation for these years certain statistical information for both elementary and high schools is given also in order to preserve this information in permanent form.

Respectfully submitted,

M. R. HINSON,  
State Director of Instruction.

## ACCREDITED ELEMENTARY SCHOOLS—WHITE

For the Year 1932-33

Group I—A school of ten or more teachers    Group III—A school of three to six teachers

Group II—A school of six to nine teachers    Group IV—A school of one or two teachers

A **Limited Standard School** meets all required points and at least 25% of the flexible points, but the building need not measure up to all modern specifications.

A **Regulation Standard School** meets all required points and 25% of the flexible points.

A **Superior Standard School** meets all required points and 75% of the flexible points.

(For requirements for standardization see Standards for Florida Elementary Schools, published by the State Department of Public Instruction, July 1, 1931).

## CHAPTER III

### SCHOOL FINANCE

Under the act providing for the Establishment and Maintenance of a Uniform System of Public Free Schools, (Paragraph 3, Section (C), Chapter 16170, Acts of 1933), provision was made for the employment by the State Board of Education of "such subordinate assistants as the State Superintendent of Public Instruction may recommend, and as said Board of Education shall find necessary, to serve under and as assistants to the State Superintendent of Public Instruction so as to insure the maintenance of the uniform system of public free schools hereby established, and upon the recommendation of the State Superintendent to provide for and fix the duties and compensation of such assistants to the State Superintendent of Public Instruction."

Acting under the provisions of the above mentioned law the State Superintendent on June 7, 1933, nominated two assistants to be known respectively as the State Director of Instruction and the State Director of School Finance. These nominations were unanimously approved by the State Board of Education.

Pursuant to his appointment the State Director of School Finance has during the fiscal year ending June 30, 1934, given his time to the following duties:

1. Assisted the State Auditor and others in
  - (a) The revision of the form of the annual report of the County Superintendents to the State Superintendent;
  - (b) The revision of the form of the annual budget to be submitted by County Superintendents and County Boards to the State Board of Education;
  - (c) The setting up of a new accounting system in the offices of County Superintendents.
2. Visited the various county seats prior to time for submission of budgets to the State Board of Education and assisted County Superintendents (and County Boards in some cases) in making up their budgets.

3. Assisted as many County Superintendents as time would permit in the matter of formulation of their annual reports and salary schedule sheets to be used in computation of instruction units.

4. Drew up proposed rules and regulations having to do with transportation of school children, prepared forms of reports on transportation, and inspected 192 school busses in 22 counties.

5. Assisted in making a survey to determine, by actual count of pupils present on the day of the visit, how well negro children attend school. (Enough white schools were checked to serve as a means of comparison between the attendance of the two races.) This survey also brought out certain information with reference to condition of school plants, qualification of teachers, etc.

6. Assisted the Director of Instruction in the inspection for possible accreditation of elementary and high schools applying for standardization.

7. In the office checked budgets and annual reports, carried on the necessary regular correspondence and compiled data with reference to transportation, school finance, and the computation of instruction units.

8. For a time served as contact person between the FERA and the office of State Superintendent of Public Instruction. During this time directed the gathering of data having to do with normal length of term, county and district school millage, and certification of teachers whose salaries were to be paid from Federal funds.

### REPORTS, BUDGETS, AND ACCOUNTING

Section (d), paragraph 3, Chapter 16,170, acts of 1933, provides for "a uniform system of accounting, budgets, audits, and reports to be required by—the State Board of Education of and from the several county boards of public instruction." This act was approved on May 31, 1933, and immediately thereafter conferences were held between the State Auditing Department and the State Department of Public Instruction looking to the formulation of plans for carrying out the mandates of the law. A committee consisting of the State Auditor and two of his assistants, a representative from the office of the State Comptroller, three County Superintendents, and

several representatives from the State Department of Public Instruction met daily in the State Senate Chamber for a period of about one week and laid the groundwork for modification of existing records, budgets, and reports, as well as the adoption of a uniform accounting system to be installed in the offices of County Superintendents.

After the outline of the various reports, budgets, and accounting forms had been agreed upon by the committee representatives of the State Auditing Department and the State Department of Public Instruction worked in close cooperation upon details for a number of weeks before submitting final drafts of forms to the State Board of Education for approval. The State Auditing Department, naturally, did most of the actual work on the accounting forms and budget sheets and also the finance sheets of the annual report, and the State Department of Public Instruction worked out the revised sheets of other statistical parts for the annual report of the County Superintendents to the State Superintendent.

As soon as the accounting sheets had been completed and approved the State Purchasing Department asked for bids from printers in order that each and every county might secure as many sheets as it required at a uniform price per sheet. After the contract for printing the sheets had been awarded the signatures of the State Auditor and the State Superintendent were authorized to be affixed to each and every sheet in order that the official copy of the accounting forms might easily be recognized.

An intensive campaign was then inaugurated to hasten the introduction of the new accounting system into the various counties. The State Board of Education employed a number of special accountants to assist the Auditor and his men in the installation of the new system, and by January 1, 1934, practically every county in the State had its accounts transferred to the new forms.

The new records, reports, and accounting sheets carry serial numbers that agree each with the other, item by item, and this system has eliminated much haphazard and aimless reporting and accounting.

#### **School Budgeting**

Section (d), paragraph 3, Chapter 16,170, acts of 1933, as already stated elsewhere in this report calls for the setting up of a uniform system of school budgets, and

section (f) of the same paragraph makes it the duty of the "Board of Public Instruction or County Budget Commissions of the several counties of the State of Florida to submit prior to June 15, of any year, for examination by the State Board of Education their annual budgets and estimates of receipts or expenditures for the ensuing year."

Immediately following the approval of this law May 31, 1933, the State Department of Public Instruction prepared and sent to the County Boards of Public Instruction, and through them to the Budget Commissions of counties having such commissions, blank forms for their convenience in making the said reports. At a later date the form of the budget report was revised by the special committee mentioned elsewhere in this report. Comparable data contained in the reports for 1933-34 and for 1934-35 are shown in Table I. which follows.

TABLE I.

\*In some cases County Boards asked for and were given permission by the State Board of Education to make certain changes not here given.

### Difficulties Encountered in Budgeting

Contact with the County Superintendents and County Boards has shown that these officials labor under some decided handicaps in making up accurate budgets, and in the submission of them to the State Board of Education "prior to June 15th of any year." Some of these difficulties are as follows:

1. Assessed valuation of all property, personal and real, for any county must be known before an accurate estimate of income from taxation can be made. As the matter now stands the tax assessor must submit his tax roll to the County Commissioners for approval on the first Monday in July; on the first Monday in August protests must be made by tax payers not satisfied with their assessment; and on the first Monday in October the roll must be finally approved and the assessed valuation definitely known. The best that Boards of Public Instruction can now do is to get the Assessor's best estimate of what value the tax roll will have, and base their estimates of income on that amount.

2. Some of the counties—especially the larger ones—have special budget commissions. In most cases these commissions were created by special acts of the Legislature—that is they apply to counties having certain definite populations as shown by some definitely designated census. In counties having budget commissions school boards must frequently await the action of that body in making up the budget having to do with **general** funds (the Budget Commission being in some cases prohibited by law from budgeting **district** funds.) This frequently prevents the Board of Public Instruction from making up its entire budget, general and district, and having it ready for the State Board of Education "prior to June 15th."

In a majority of cases the law creating the budget commission specifies June 1st as the date on which the estimates of that commission must be submitted to the County Commissioners, the Welfare Board, the Board of Public Instruction, etc., but in some cases the County Board of Public Instruction has been compelled to await the action of the budget commission until after the time had passed for submitting its budget to the State Board of Education.

In the case of budget commissions in counties of more than 150,000 population a special act of the Legislature designated June 20th as the date upon which the commission must certify its budget to the County Commissioners, the Board of Public Instruction, etc. (See House Bill No. 1296, Chapter 15,939, Acts of 1933.)

The chairman of one budget commission has contended that his commission is not under obligation to certify its budget to the County Board of Public Instruction before June 20th, and cites the above mentioned law as his authority.

However section (f), paragraph 3, Chapter 16,170, Acts of 1933, makes "prior to June 15th" applicable both to Boards of Public Instruction and County Budget Commissions for submission of budgets to the State Board of Education. Surely some harmonious action should be taken to enable County Boards of Public Instruction to submit their budgets to the State Board of Education upon the date set by law. Inasmuch as the Budget Commission does not make a budget for district funds, but for general funds only, it would seem reasonable that the Board of Public Instruction which must budget both general and district funds should receive the necessary information in time to comply with the requirements of the law.

3. A third disadvantage under which County Boards are laboring in making up their budgets is their inability to know "prior to June 15th" how much they may expect from State sources. If State sources of revenue for schools could be certain and not changed by every Legislature, estimates could be made from the experience of preceding years; but if frequent changes are made in sources of income, confusion in budgeting must continue.

4. Some Boards of Public Instruction are at a loss to know whether they should estimate district and county receipts from taxation for the next year upon a basis of collections in recent years, or if they should put down an anticipated income of not more than 95% of the proceeds that would be produced by the authorized millage applied to the assessed valuation. There seems to be an urgent need for a correct answer to this question.

(Since the above was written the Supreme Court of Florida has decided that "all tax levies must be made

on a basis of 95% collection, regardless of what percentage were collected in prior years," so this decision would seem to authorize budgeting on the basis of 95% of the amount that would be produced by the authorized millage applied to the assessed valuation.)

5. Another question that confuses the maker of the budget is that of adequate salaries of teachers and the relation of adequate salaries to length of term. Teachers have frequently been placed upon starvation salaries in order that the schools might be kept open for a given number of months. This places the load of responsibility for maintaining a full term upon the shoulders of only one class of citizens, namely, the teachers. This of course is unfair to the teachers.

Boards should budget fair salaries for the length of term the funds in sight will provide and close the schools when the money is all expended.

6. The question of how much money ought to be budgeted for retirement of back indebtedness is one that gives County Boards much trouble. As far as bonded indebtedness to be paid from district interest and sinking funds is concerned there is comparatively little trouble, but back salaries due teachers and bus drivers, old open accounts, county-wide bonded indebtedness (not provided for by an interest and sinking fund), refunded debts, outstanding time warrants and certificates of indebtedness, and ordinary due bills (some of them interest bearing) represent actual indebtedness which the boards are under moral obligation to pay. However, there are some obstacles in the way of budgeting for the payment of these back debts which may be stated as follows:

- (a) There does not seem to be any definite legal requirement for such budgeting (except in cases where interest and sinking funds are provided for—see sections 570 and 735, pages 214-257, Compiled General Laws of Florida, 1927.)
- (b) There seems to be a rather definite legal assumption that budgeting shall be "for the **maintenance** of the necessary common schools of" a "county for the next scholastic year." See section 561, sub-section 13, page 210, Compiled General Statutes of Florida, 1927.

- (c) Paragraph 21½, Chapter 14892, Acts of 1931, states that "In making up the budget for each ensuing year it shall be the duty of the Board of Public Instruction of each county to make a careful estimate of the amount of money which will be allotted to each county under the terms and provisions of this act (An act providing for a Minimum of Eight Months Free Schools and an Appropriation Therefor) and after having determined the necessary expenditures for the **operation and maintenance** of the schools, to deduct from the sum of estimated expenditures the estimated (State) revenue to be received under this Act and **taxes shall only be levied in an amount or at a rate sufficient to produce the difference.**"

Surely something should be done to give definite authority to pay back debts of every nature by budgeting a fixed amount for that purpose every year until such time as the Board can proceed upon a pay-as-you go basis.

### ANNUAL REPORTS

The newly revised annual report of the County Superintendent to the State Superintendent was used for the first time this year. This new report is less extensive than the report formerly used, but is more definite and exacting in the matter of detail—especially that part having to do with the financial report. As stated elsewhere in this report the same serial numbers under which items of receipt and expenditure are placed in the new accounting forms and in the new annual budget are used in this new annual report. The report of the County Superintendent to the State Superintendent is due in the office of the latter "on or before the fifteenth of August of each and every year" (Sec. 89, Chap. 8547, Acts of 1921), but on last August 15th only 83% of all the reports had been received. Had all of these reports then received been correctly made out when received much delay and confusion would have been avoided; but on account of inaccuracies 60% of the reports had to be returned to the County Superintendents for correction, and some had to be returned a second or a third time.

At the present time (October 11, 1934) several of the reports returned for correction are still out.

Some of the causes for sending in inaccurate reports seem to be the following:

1. Failure to copy exactly on the blank sheets the items as made out on the work sheets.
2. Failure to check every item and every total before sending the report to Tallahassee.
3. Failure to realize or take into consideration the fact that certain items on given pages must correspond exactly with the same items found on other pages.
4. Failure to show the same amount of cash on hand as of July 1st that was reported for the year closed on June 30th (the day before).
5. Failure to report the right value for textbooks furnished by the State.
6. Failure to report the correct amount received from State sources during the fiscal year.
7. Failure to keep separate and distinct records of receipts and expenditures in the appropriate columns, as General Fund, District Maintenance Fund, Bond Fund, and Interest and Sinking Fund.
8. Failure to place items of receipt or expenditure (especially expenditure) under the appropriate heads, as General Control, Instruction, Operation, Maintenance, etc.
9. A disposition on the part of some to duplicate receipts and expenditures by the inclusion in the report of unnecessary transfers.
10. A decided tendency to confuse bond funds items with interest and sinking fund items.

#### **County Data for Annual Report**

The weakest "link" in the whole system of records and reports is found in the inaccuracy of teachers in keeping their daily records of attendance, and in the consequent unreliability of monthly and final reports sent to the County Superintendents. The County Superintendent must of necessity look to the teachers and principals for the information he must pass on to the State Superintendent, but in many cases the information he receives by means of monthly and final reports is unreliable in the

extreme. The State, at great expense, furnishes teachers' daily registers and monthly and final report blanks, but if these are not properly used the whole reporting system becomes a farce.

Because of its importance in the determination of amounts of State funds to be apportioned to counties upon the instruction unit basis **average daily attendance** of pupils is extremely important. Failure to keep accurate and reliable daily records and to report attendance as it actually occurs makes for confusion and injustice in the State allocation of school funds.

During the school year 1933-34 two members of the staff of the State Department of Public Instruction visited 730 negro schools in forty-one counties for the purpose of inspecting school registers and counting pupils in actual attendance. The visits were made as far as possible on fair days, and when the weather was not extremely cold. Inspection of 1790 registers in forty-one counties showed 720 in good condition, 896 poorly kept, and in 174 cases the register was not even at the school.

The greatest irregularity discovered by the investigation already mentioned is the reporting of attendance of children in excess of the number actually present. Table II. shows actual counts of children present in 730 negro schools in forty-one counties on the days visited by State Department representatives.

\*The numbers in parentheses are for schools visited this year; the numbers not in parentheses are those reported for 1932-33.

\*\*November 1933; May 1934 attendance 15 schools (12 city and 3 rural) 76% of enrollment.

Taking Alachua County as an example the data for each of the forty-one counties in which this investigation was carried on may be interpreted as follows:

1. Number of negro schools in county ..... 48
2. Number of negro schools visited ..... 47
3. Pupils reported enrolled in the 47 schools ..... 4,028
4. Number of pupils present on day of visit ..... 2,764
5. Per cent that number present was of enrollment ..... 69
6. Per cent average daily attendance was of enrollment for negro schools of county for year ..... 73
7. Per cent average daily attendance was of enrollment for white schools of county for year ..... 83  
(6 and 7 obtained from Annual Report of County Superintendent for 1933-34.)

A careful study of this table cannot fail to show that as compared with the number of pupils found to be present upon the day of the visit by a State Department inspector the percentage of attendance claimed for the year is in some cases unbelievably large. Some County Superintendents are carefully checking the reports coming to them and are reducing to a minimum the evil of "padded" attendance, and it is hoped that all will give this matter that attention which its seriousness deserves.

Table III is similar to Table II. It gives data for 189 white schools in twelve counties visited during the school year 1932-33.

## INSTRUCTION UNITS

As the burden of support for the public free schools of a commonwealth is more and more shifted from local and county units to the State it becomes increasingly necessary to make use of some equitable means of distribution of State funds to the various counties.

In the attempt to give Florida a means of distribution that would be fair to every type of county—rural, semi-rural, and urban alike—the Legislature of 1931 passed "An Act Providing for the Appropriation of State School Funds Upon an Instruction Unit Basis." (See Chapter 14,829, Acts of 1931.)

This law is now in the fourth year of operation and it has apparently given very general satisfaction.

Table IV which follows gives some interesting comparative data for the instruction units for the various counties for the whole time the law has been in force.

**TABLE IV**  
**COMPARATIVE DATA OF INSTRUCTION UNITS**

COUNTIES	1931-1932	1932-1933			1933-1934			1934-1935

### Some Suggested Improvements of the Instruction Unit Law

Close observation of the actual administration of this law leads to a few suggested changes.

1. In paragraph 6, beginning on line 5, the language which reads "a statement of the number of teachers **to be employed** in each school of the county **for the current year**, together with the annual salary **each will receive**," should be omitted and in lieu thereof there should be substituted the statement that the annual salaries, school by school, as given in the annual report of the County Superintendent to the State Superintendent for the fiscal year just closed shall be used in the computation of the amounts to be allotted for the various schools upon the instruction unit basis. This substitution would obviate the necessity for making up a salary scale in every county before it is definitely known how much money will be available from State and other sources for running the schools for the following year. Placing the basis of the instruction unit upon salaries already paid (insofar as salaries enter into the computation of the unit) will be fair to all concerned and will simplify both the reporting of the salaries and determination of the amounts to be apportioned on the basis of instruction units.

Average daily attendance which is the primary basis of computation of instruction units must of necessity be taken as of the preceding year, and this being the case there seems to be no good reason why the salaries paid for the preceding year should not also be used in making unit computations.

Table V gives in parallel columns the totals of salaries to be paid county by county as shown on data sheets submitted to the office of the State Superintendent for the fiscal year 1932-33 and the actual amounts paid for salaries for that year as shown by the annual reports of the County Superintendents.

TABLE V

\*These counties paid out more than set up.

Table V shows a wide variation in estimated and actual expenditures for salaries, but counties cannot easily estimate what they can pay for the next year until they know definitely what revenue will be available from all sources. If the proposed change in method by which the **actual salaries paid for the preceding year** be used in computing estimated apportionments rather than the **estimated salaries that will be paid for the succeeding year**, then a long step toward simplification of procedure will have been taken.

2. A second possible revision of the instruction unit law is one that would tend to encourage more than is done by the law in its present form the matter of consolidation of weak one, two, or three-teacher schools into larger and better schools. As the matter now stands the weaker schools are in some instances being maintained because they can bring the counties more State revenue than better organized and better equipped schools would demand.

Provisions might be made that:

- (a) Not more than one unit under any circumstances be assigned to a one-teacher school.
- (b) Schools—unless separated from other schools by impassable natural barriers—operated with small enrollments and poor equipment must be consolidated with other schools according to some well planned scheme of consolidation before being allowed State funds upon the instruction unit basis.
- (c) Schools of the same race not located in incorporated towns or cities being maintained within three miles of each other, unless separated by impassable natural barriers, may not be allowed State funds for maintenance as long as this condition of location exists. (See section 36, item sixth, Chapter 3872, Acts of 1889.)
- (d) Schools in which one or more teachers are employed who do not hold valid Florida certificates may not be allotted State funds for the year succeeding that in which the said uncertificated teachers were employed.
- (e) Schools in which (a) provision is not made for

conserving the health and safety of the children and ministering to their ordinary comfort, (b) the ordinary necessary school equipment is not furnished, (c) a necessary source of water supply for drinking and washing purposes is not provided, (d) and where sanitary toilets as required by law and by State Board of Health regulation are not furnished shall not receive State funds until the necessary changes shall have been made to meet reasonable requirements in these respects.

3. Provision should be made by law for changes in ratios used in the determination of instruction units as new conditions in the State arise which make such changes necessary to a more equable distribution of State funds. Such changes could be made by the State Board of Education after conducting hearings for the purpose of allowing all interested persons to express opinions with reference to any proposed changes in ratios.

### TRANSPORTATION

Paragraph 3, section (e) Chapter 16,170, Acts of 1933, makes it the duty of the State Board of Education "To fix and enforce standards of maximum cost, minimum requirements of equipment, qualifications of drivers, distance traveled, and pupil-miles per bus in the transportation of school children."

In compliance with the requirements of this law the State Board of Education on July 5, 1933, adopted certain regulations having to do with transportation, and at later dates certain modifications and changes were made as indicated by the following Transportation Regulations published August 15, 1934.

(Regulations passed by the State Board of Education July 5, 1933, with amendments and additions passed on the dates as herein indicated.)

### MAXIMUM COST

1. The maximum cost of school transportation to be paid from the Teachers' Salary Fund for any county for any scholastic year (July 1 to June 30 inclusive) shall not exceed  $12\frac{1}{2}\%$  of the total amount available from the said fund for the said county for that year.

At a meeting of the State Board of Education held July 25, 1934, the following action was taken: The regulation whereby the Board allowed a maximum of  $12\frac{1}{2}\%$  of the Teachers'

Salary Fund for transportation was discussed. It was ordered that no change be made in the regulation except in individual cases where assurance was given the Board by the county school authorities that teachers would be paid before any amount in excess of the 12½% of the Teachers' Salary Fund would be allowed for transportation costs.

2. Upon blanks furnished by the State Superintendent of Public Instruction County Superintendents at required intervals shall make reports to the State Superintendent with reference to pupil-miles per bus, condition and makes of the busses, condition of roads traversed, number of pupils transported per bus, salaries of drivers, and other facts pertinent to a determination of necessary needs and costs of transportation.

### MINIMUM REQUIREMENTS OF EQUIPMENT

Each motor bus used in transporting children must meet the following general requirements:

1. It must have a good motor, reliable steering gear, dependable brakes, tires in good condition, a good windshield wiper, a good horn, good lights, and all necessary emergency tools. Non-skid chains should be provided where necessary in the counties having roads over clay hills.  
(As amended Aug. 15, 1934)
2. A strong and durable body sufficiently large to enable the children of the route to be comfortably seated, provided with padded seats if the bus is to be used on rough roads, and so equipped as to afford protection against cold and rain.

At a meeting of the State Board of Education held June 12, 1934, action was taken to the effect that the Secretary was requested to strongly urge the use of busses with all steel bodies during the year ending June 30, 1935. The regulation was also passed under which all school busses would be required to be equipped with steel bodies for the year beginning July 1, 1935, and thereafter.

The door for entrance and exit of children must be to the right and near the driver's seat. An emergency door in the rear must be provided with a fastening device which may be quickly released in case of an emergency, but which shall be protected against accidental release. Busses on which the emergency door release is under the control of the driver from his seat must also be provided with an uncoupling device at or near the door that may enable some designated person, seated near the door, to open the same in an emergency.

(As amended Aug. 15, 1934)

If glass windows are provided these should be of shatter proof glass.

The driver's mirror should be of suitable size to show clearly the interior of the bus and a good view of the highway through the rear of the bus.

3. The bus must be marked **School Bus** on each side and each end. Also, there must be a **Stop** sign in the rear.

## DEPARTMENT OF PUBLIC INSTRUCTION

At a meeting of the State Board of Education held May 16, 1934, a resolution was passed to the effect that effective at the beginning of the next school term all school busses must be painted an orange color and that the words **School Bus** must appear in black letters, not less than five inches in height, on each end and on each side of each and every bus. (As amended Aug. 15, 1934)

4. Each bus must be given a thorough inspection at the beginning of the school year, and at least monthly thereafter while in school use, by a reliable mechanic approved by the County Board of Public Instruction, and any necessary repairs made immediately. (As amended Aug. 15, 1934)

**QUALIFICATIONS OF DRIVERS**

The driver of a school bus must be:

1. Not less than 18 years old.
2. In good health and physically sound and alert.
3. Normal in hearing and vision, and able to distinguish the colors of the primary scale.
4. Of good moral character, and an abstainer from alcoholic liquors.
5. Able to control children on the bus.
6. Able to make emergency repairs.
7. One who can drive skillfully, and protect the children from possible accidents.
8. One who observes carefully and obeys to the letter all traffic regulations and rules of the road.
9. One who keeps his bus clean and attractive, and who takes a kindly interest in the children he transports.

**ROUTES**

Unless by special permissoin of the State Board of Education granted on account of unusual conditions:

1. No child in grades 1-6 shall be transported for a total distance (round trip) of more than 30 miles per day. No pupils in grades 7-12 shall be transported for a total distance of more than 50 miles per day.
2. No child shall be required to catch a school bus before 6:30 o'clock A. M. and each and every child shall be returned to the point at which he regularly catches the bus not later than 5:30 o'clock P. M.
3. No child residing within 2 miles of the school he attends shall be transported at public expense.
4. It shall be the duty of Boards of Public Instruction of the various counties to designate each and every bus route in their respective counties as a "trunk line", and pupils residing not more than 2 miles from any designated "trunk line" shall walk to (or be transported without public cost) to convenient stations along the said lines.

Nothing in this regulation shall be construed to mean that

in times of very bad weather bus drivers may not drive short distances away from "trunk lines" to return children to their homes.

5. It shall be the duty of the County Superintendents and County Boards of Public Instruction to definitely map the route to be traversed by each school bus and to make a schedule of arrival and departure of the bus for each and every station—said schedule to be posted in the bus for its particular route.

### COUNTY BOARD REGULATIONS

County Boards of Public Instruction are authorized and encouraged to set up additional rules and regulations not out of harmony with those established by the State Board of Education.

### CONTRACTS FOR TRANSPORTATION

1. Any contracts for transportation in existence at the time of the adoption of these regulations may be continued for the length of time specified in the said contracts.
2. It is to be understood in awarding any contract for transporting school children that the contractor is to be the driver of his bus unless specific designation of some other person or persons is made in the said contract.
3. No School Board member or Special Tax District Trustee shall be a contractor for transporting school children or be engaged as a driver of a school bus.
4. At their discretion County Boards of Public Instruction may require bus drivers to do any necessary work of improvement or repair on the school grounds or buildings when not actually engaged in driving school busses.
5. Form of contract.

### TRANSPORTATION CONTRACT

THIS CONTRACT, made and entered into on this the ..... day of ..... A. D. 193..... by and between THE BOARD OF PUBLIC INSTRUCTION of ..... Florida, party of the first part, and ..... of ..... Florida, party of the second part, WITNESSETH that

(Sec. 1). For and in consideration of the sum hereinafter mentioned to be paid to him by the party of the first part, the party of the second part hereby contracts and agrees to perform the following described transportation of public school children of ..... Florida, according to the manner herein agreed upon and under the direction of the party of the first part.

(Sec. 2).

(Sec. 3). The time of transportation shall begin on the ..... day of ..... A. D. 193..... and shall continue for the term of school at the option of the party of the first part. The party of the second part is to furnish at his own expense, all necessary busses and other equipment, fuel, drivers, and otherwise bear all expenses necessary to complete the terms of this contract without extra cost to the party of the first part.

(Sec. 4). The transportation is to be performed by the use of a bus or busses properly equipped for the prompt, safe and comfortable conveyance of all children entitled to such facilities under this contract. The party of the second part shall keep said bus or busses in such condition at all times as to insure prompt, safe and comfortable transportation for those provided for under this agreement. The bus or busses shall be provided with padded seats, waterproof storm curtains and top or as otherwise specified and shall be kept in charge of a competent driver or drivers satisfactory to the Board of Public Instruction. The conveyance or conveyances shall at all times be operated in such manner as to minimize the dangers that ordinarily accompany the use of motor driven conveyances, and it is agreed and understood that reckless or careless driving will not be permitted by the party of the second part and will not be tolerated by the party of the first part. The operating schedule shall be prescribed by the Board of Public Instruction.

(Sec. 5). The bus or busses shall not be used for the transportation of passengers who are not school children with or without compensation to the party of the second part, when such bus or busses are occupied by school children, unless a special permit be first secured from the party of the first part.

(Sec. 6). The party of the second part shall be held responsible for the conduct of children transported while in his care, as far as he may be reasonably held. He shall have the same power of control as those of a teacher, except that of punishment. In cases beyond his control he shall make a written report on the day of occurrence to the principal of the school attended. It is agreed and understood that he will not smoke, or use profane or indecent language while driving a school bus occupied by school children, and that he will not permit a driver employed or any pupil transported to do so.

(Sec. 7). The driver of bus or busses under this contract while transporting children to and from school shall be required to stop said bus or busses at the approach of all railroad crossings and ascertain whether or not a train is approaching before continuing across the railroad tracks.

(Sec. 8). In case of rainy days this bus shall go as near as practicable to the gate of each child transported in taking children to and from school. He further agrees to comply with any other rule and regulations that the Board may deem wise to make.

(Sec. 9). The party of the second part shall keep an accurate record, in a book to be furnished, of the attendance of all children transported by him, and make report of the same at the end of each school month to the County Superintendent in the manner prescribed by him after said report has been approved by the principal of school. It is understood and agreed that payment for any month's service under this contract shall not come due until the next regular meeting of the Board of Public Instruction after the close of the school month during which such services are rendered and then not until the required reports have been rendered and accepted.

(Sec. 10). It is understood and agreed that said Board may

lengthen or shorten the term of this contract at any time without notice, should any financial condition arise that would make it necessary.

(Sec. 11). For and in consideration of the services herein mentioned to be well and faithfully performed in accord with the terms of this contract and in the manner herein prescribed, the party of the first part hereby agrees and contracts to pay to the party of the second part the sum of \_\_\_\_\_ Dollars (\$ \_\_\_\_\_) per school month, in good and lawful money of the United States of America, such payment to be made at the next regular meeting of the Board of Public Instruction after the close of the school month during which such services are rendered and after receipt of a correct report of such transportation as hereinbefore mentioned and prescribed.

Signed, sealed and delivered this the day, month and year above written.

WITNESSES:

BOARD OF PUBLIC INSTRUCTION

\_\_\_\_\_ COUNTY, FLORIDA

\_\_\_\_\_ Sec. and Supt.

By \_\_\_\_\_ Contractor.

Item 2 under Maximum Cost, State Board of Education Regulations, passed on July 5, 1933, provides that "Upon blanks furnished by the State Superintendent of Public Instruction County Superintendents at required intervals shall make reports to the State Superintendent with reference to pupil-miles per bus, condition and makes of busses, condition of roads traversed, number of pupils transported per bus, salaries of drivers, and other facts pertinent to a determination of necessary needs and costs of transportation."

In compliance with the requirements of this State Board Regulation blank forms for gathering the required necessary information were prepared and furnished to County Superintendents. Tables VI-VIII which follow give the information furnished by County Superintendents to the State Superintendent as of November 15, 1933.

\*Data Not Given.

\*\*Annual Report.

The compilations were made by the State Director of School Finance, but on account of omissions of data having to do with certain items furnished this office the tables are necessarily incomplete in the cases of such items. The tabulations are, however, sufficiently complete to give a good picture of the school transportation situation as it exists in Florida at the present time. The following facts gleaned from Table VI may be of interest:

1. There were in the fall of 1933 1,382 school busses in use in Florida.
2. Of these busses 569 each had a Ford chassis, 545 a Chevrolet chassis, and 244 some other kind.
3. 752 bus bodies were home-made, 446 factory made, and 184 had touring car or other similar bodies.
4. Of the busses in use last fall 364 were being used for the first time or had been in use only one year; 342 had been in use two years; 266 three years; 146 four years; 82 five years; 59 six years; 35 seven years; 41 eight years; 12 nine years; and 6 ten or more years.

Table VII which gives data with reference to transportation routes reveals the following facts:

1. 10,548 miles or 51% of the roads in Florida traversed by school busses are hard surfaced; 2,600 miles or 13% are of sand-clay construction; 4,827 miles or 24% are graded; 2,477 miles or 12% are unimproved.
2. There are 20,452 miles of bus routes in Florida.
3. The longest route reported has an extent of 80 miles (one way), the shortest route is only 1 mile long (one way).

Table VIII shows for the State as a whole:

1. An average of 485 pupil-miles per day per bus is being maintained.
2. An average cost of \$0.0081 per pupil-mile per day is being paid.
3. A median pupil load of 36 pupils per bus is being transported.
4. A total of 57,647 pupils are being transported.
5. The median age of Florida bus drivers is 37 years.
6. An average salary of \$71.74 per month per bus driver is being paid.

A careful study of Tables VII and VIII is helpful in obtaining answers to questions like the following:

1. What relationship exists between nature of roads traversed and cost of transportation?
2. What relationship, if any, can be shown between sparsity of population and transportation costs? Density of population and costs?
3. Can a definite connection be shown between number of pupils transported per bus and costs per pupil? Between salaries paid drivers and average costs?
4. Does ownership of busses by counties make for reduced or increased costs?
5. What relationship, if any, exists between comfort and safety of children and costs of transporting them?
6. How many routes are being maintained for length (round trip) in excess of the maximum set by State Board of Education regulation?
7. Considering the fact that bus drivers in many counties own their busses and must pay costs of operation and upkeep, are they being sufficiently well paid for their investment and labor?

Answers to these and other questions would be interesting and instructive, but space does not permit their further discussion in this report. It is hoped that those who desire answers to such questions as are here propounded will make a careful study of Tables VII and VIII and draw all necessary conclusions from the data given.

#### **SOME RECENT DATA HAVING TO DO WITH FLORIDA SCHOOL DEBTS**

During the period May 9 to June 13, 1934, the State Director of School Finance visited 66 of the 67 counties of Florida in the interest of the State School Budget. The remaining county was contacted through correspondence.

In addition to rendering all possible assistance to Superintendents and Boards in making up their budgets

for 1934-35, the Director secured from the Superintendents first hand information with reference to all kinds of school debts owed by the various counties.

After this information had been assembled and classified in the office at Tallahassee each Superintendent was furnished a data sheet upon which was typed the amount of debt under each head as put down when the record was first made in his office. A request that the Superintendent verify these figures or make necessary changes in the amounts was responded to by 56 of the 67 Superintendents. In the cases of the 11 counties, whose Superintendents did not respond to the request to check the data furnished, the original figures gathered in the first place were used in making up Tables IX and X which follow.

\*A suit on \$15,000 of this amount was filed in Federal Court and the Court has held that the issue was illegal.

\*\*County-wide bond issue.

†Certificates of indebtedness.

§In litigation (\$147,500 Principal and \$55,320 Interest due June 22, 1934.)

‡Due janitors, high school secretary, and unpaid administration salaries.

Table IX has to do with the amounts due teachers and bus drivers for services rendered prior to the school year 1933-34, and also gives the amounts counties owe on old open accounts for furniture, supplies, etc. It will be noted that school boards owe teachers themselves only \$312,408.00, but that merchants, bankers, money lenders, etc., have taken over \$487,278.00 of the notes, warrants, due bills, etc., originally issued to teachers. In like manner the indebtedness due to bus drivers has in part drifted into other hands.

The amounts here given as due to teachers and bus drivers and the amounts of the certificates of indebtedness of one kind or another they have been able to dispose of to others—often at a considerable discount—are approximate only, for in the very nature of the case no one can do more than make shrewd estimates with reference to the actual amounts now owed to those to whom notes, due bills, etc., were originally issued.

Table X is self-explanatory, but it may be said in this connection that the amounts due teachers and bus drivers shown in Table IX are no doubt in many cases counted in some of the items of Table X. Time warrants and Refunded Debts may also include, in some cases, indebtedness to teachers and thus make the total amounts due on account of teachers' services greater than Table IX would indicate.

### Summary

Keeping in mind the explanatory statements made in the above paragraph we can see that there is owed:

1. Teachers themselves (back salaries) .....	\$ 312,408.00
2. Others, for teachers' services (back salaries) ..	487,278.00
3. Bus drivers themselves (back salaries) .....	44,103.00
4. Others, for bus drivers' services (back salaries)	57,203.00
5. On old open accounts (furniture, supplies, etc.)	329,940.00
6. For time warrants and interest on the same— may not all be due or past due .....	2,521,060.00
7. For county and district notes and bonds and interest on the same. (Not I. & S. Fund bonds) May not all be due or past due .....	2,689,125.00
8. For refunded debts and interest on the same— may not all be due or past due .....	1,672,603.00
9. For other debts—not well classified .....	299,118.00

## STATE SUPERINTENDENT'S REPORT

149

10. For bonds in default (county, district, and I. & S. Fund) .....	2,555,617.00
11. For interest in default (county, district and I. & S. Fund) .....	1,825,569.00
	<hr/>
	\$12,794,024.00

The total amount here shown no doubt includes some duplications. Items 6, 7, 8 may include amounts not to be classified as now due, but do represent obligations incurred by the school systems in years prior to 1933-34. Bonds not in default and to be retired by District Interest and Sinking Funds are not considered in this study.

STATE OF NEW YORK

In the County of ...  
I, the undersigned, Clerk of the Court of Sessions,  
do hereby certify that the within and foregoing is a true and correct copy of the original as the same appears from the records of the Court of Sessions.

In testimony whereof, I have hereunto set my hand and the seal of the Court of Sessions at the City of New York, this ... day of ... 19...  
Clerk of the Court of Sessions.

## CHAPTER IV

---

### NEGRO SCHOOLS

In democracy education holds the most promising potential solution of the social and economic problems for peaceful, gradual, intelligent evolution toward the goals which we must set up for the preservation of the ideals and the happiness of our citizenship. As yet all too small a percentage of the Negro children of our country, especially in its rural sections, enjoys adequate or equitable facilities for the education which is America's goal for every child. We have neither schools enough properly to accommodate the children who should be in attendance, nor educational offerings of the quality and variety adapted to their needs. How to meet these two fundamental requirements adequately, and the ramifications into which consideration of their varied aspects takes us, are the problems to which this conference will devote its attention. May it result in rendering the significant service it aspires to render to our country and to the Negro race.

Franklin D. Roosevelt.

(Message to the National Conference on Fundamental Problems in the Education of Negroes. Washington D. C. May 9-12, 1934.)

During the biennium 1932-34 the State Agent for Negro Schools in Florida organized his work around the following objectives:

1. To help decrease retardation of Negro children by directing attention to such causes and remedies as might lie in the administration of school funds, the management of schools, the methods of teaching and in the attendance and promotion of the children.
2. To encourage in every possible way better training and certification of Negro teachers, and the employment of trained teachers by school officials.

3. To emphasize the importance of high schools for Negroes.

4. To cooperate with the officials of the Negro Colleges in the State for the development of the colleges and their service to the state.

5. To cooperate with the other State Supervisors and the representatives of the Philanthropic Funds for improving special phases of school work.

The methods used to accomplish these objectives were: (1) visitation of all Negro schools to inspect registers, check attendance, call attention of the teachers to possible improvements, (2) meetings of teachers following visits, (3) conferences with county superintendents, county boards and other school officials, (4) special meetings with principals of Negro schools once a year, meetings of Deans of colleges and of special committees, (5) attendance at the annual State Negro Teachers' meeting, (6) attendance at a Special Seminar on Race Problems at Yale University, summer of 1934.

### **Retardation**

In 1921-22 forty-four per cent of the Negro children enrolled in Florida schools were in the chart class and first grade. At that time Negro schools operated short terms and it was necessary for a child to remain in a grade two terms in order to do the work required in a grade. While teaching during the short terms teachers became accustomed to keeping the beginning children in the chart class one term and in the first grade one term. When school terms were lengthened the teachers continued to teach the beginning group in the chart class one term and the same group a second term in the first grade.

In 1931-32 thirty-eight per cent of the children were still in the chart class and first grade even though the average term for Negro schools that year was 162 days. In an effort to change the situation county teachers' meetings were held in 62 counties during which figures for the classification of children were put upon the blackboard and the causes for retardation were discussed. The causes usually agreed upon were: (1) habit of teaching children two terms in the chart class and the first grade,

(2) unqualified teachers and poor teaching, (3) unfair allotment of work, and (4) lack of daily programs and daily preparation.

Teachers were shown that white children enjoying the same length of school terms, completed the beginning work called chart class and the first grade in one year. The best qualified and most successful primary teachers explained to other teachers how to organize the work in the first year to accomplish the promotion. In counties where the superintendent was a trained school man he contributed to the discussion. In many counties the principal of the local white school attended the meeting and reported on the work of the first grade in the white school. The discussion usually ended with instructions from the county superintendent to discontinue the many divisions in the first grade and the reporting of a chart class. The teachers agreed that they could and would change.

Another cause of the retardation was that larger salaries were paid to teachers in the higher grades, that these teachers were better prepared and more successful in teaching. The county superintendent was shown that the primary grade were just as important, if not more important, than the higher grades and that the strongest, best prepared and highest paid teachers should be employed to teach the primary work.

The allotment of work in a school employing two or more teachers usually resulted in the principal, who was usually the better trained, more successful and higher paid teacher, teaching a small group of children in the upper grades and the weaker, lower-paid teacher or teachers, teaching the primary grades. The superintendent was shown that the principal of the school could teach the primary grades and that the work and grades in the school could be divided so that a more equal distribution of children and work would result. At the close of this discussion the superintendent usually instructed the principals to reallocate the work and children as suggested.

During visits to the schools in 1930-31 absence of daily programs and daily lesson plans or preparation was observed. During the summer of 1932 daily programs for small schools were prepared by a group of teachers in

small schools under the direction of Mrs. E. P. Jones at the Florida A. & M. College. The programs included the work required in the course of study and made a fair allotment of work and children to teachers. The programs were mimeographed and distributed to teachers at the meetings. The county superintendent usually instructed the teachers to follow the programs with necessary adaptations. Demonstration teaching in various grades and subjects at the meetings to show the value of daily lesson plans and daily preparation for teaching. Discussion followed the demonstration.

Reports from county superintendents in 1932-33 show that 33% of the children enrolled in the state were in the first grade, a decrease of 11% in ten years and 5% in one year. The percentage in the first grade varies from 19.7 in Lee County to 58.6 in Lafayette County. Table I. shows the total enrollment and the per cent of children in the first grade in 1932-33. The counties are ranked from the lowest per cent in the first grade to the highest per cent in the first grade.

The first grade, including the chart class, has been like the neck of a bottle in congesting children and impeding their progress. When a group of children are retained in the first grade a second year the number in that grade is usually doubled due to the enrollment of a class of beginners. Thus the work is doubled and efficiency is decreased. Furthermore, if children are retarded in the first grade they are usually retarded during the remainder of school. This retardation initiated in the first grade and continued throughout the school is very costly in time and in public expense. Age-grade sheets have been used to show superintendents, principals and teachers the extent and seriousness of retardation. An age-grade sheet is a device for showing whether children are accelerated, normal or retarded for their ages. A range of two years is allowed as normal for each grade. On account of varying birthdays and a constant entrance age to school children either six or seven years old in the first grade are considered normal. However, children eight years old or older in the first grade are considered retarded. This sheet is filled by placing the number of children in each grade opposite their ages. The accelerated children are in grades advanced for their ages. The sheet shows these children above the heavy stair-step lines. There are very few accelerated Negro children. The normally promoted children are in grades normal for their ages. The sheet shows these children between the heavy stair-step lines. The number of normally promoted Negro children is relatively small. The retarded children are in grades below normal for their ages. The sheet shows these children below the heavy stair-step lines. The number of retarded children is very large. Tables II and III are age-grade sheets for Dade and Gadsden Counties. These tables are given to illustrate the use of the age-grade sheet and to show the difference in retardation in counties having different concepts of education for Negroes and differing greatly in the provision of educational opportunities for Negroes. If achievement tests were given to the children the retardation probably would be shown to be much greater.

Teachers' salaries, per capita cost of instruction, and provision of school facilities in addition to causes discussed in teachers' meetings, bear a causal relation to the percentage of children in the first grade and the retardation in the other grades. The causal relation between average annual salaries in Table IV, the per capita cost of instruction based on salaries in Table V, the disbursement of State funds by counties on Negro schools in Table VI, the value of school property for Negroes in Table VII and the per cent of enrollment in Table I is very evident and needs no comment. Table VIII contrasts the average annual salaries of white and negro teachers. Table IX contrasts the per capita expenditures on white and negro children based on teachers' salaries. Table X contrasts the per cent of value of school property and equipment for white and negro people.

**NEGRO HIGH SCHOOLS**

Table XI shows the enrollment by counties of negro children in high school in 1932-33. The failure of some counties to provide high school opportunities for negroes is not due entirely to financial reasons. There exists, particularly in certain sections of the state, a traditional concept of one pattern of education for white people and another pattern of education for negroes. This concept has its basis in the kind of occupations in which negroes have engaged in the past. Formerly certain occupations were considered as work for negroes. Those occupations are now being filled by white people. Simultaneously negroes are entering professions formerly filled entirely by white people. The former occupational division line was considered horizontal with the white people on the upper side and the negroes on the lower side. A perpendicular division line is forming, on one side of which white people have a range of occupations from common labor to professions, and on the other side of which the negroes are developing a similar range of occupations. Negro doctors, dentists, teachers, and others are serving the negroes more, and the white professional people are serving them less. This development seems far more wholesome than confining the entire race to one kind of occupation, and allows those of ability to develop and serve their race. In order for negroes to make this development local school officials need to enlarge their concept of the functions of public schools for negroes and provide high school opportunities for them.

## DEPARTMENT OF PUBLIC INSTRUCTION

## CERTIFICATION OF NEGRO TEACHERS

Table XII shows the types of certificates held by employed Negro teachers for the decade 1922-23 to 1932-33.

Negro teachers in Florida have made marked progress in the last ten years in raising the status of their certification. A study of Table XII reveals a decrease during this period in the number of certificates issued on examination and a marked increase in the number of certificates issued on the basis of college training.

On October 1, 1934, negro teachers in Florida held 1037 valid certificates granted on examination and 1753 valid certificates granted on training. In 1932-33 there were 2677 teaching positions in Florida negro schools. This means that at the present time there are enough certificated teachers to fill all teaching positions and enough college trained negro teachers are available to fill 65% of the teaching positions in the negro schools of Florida.

It can be noted from Table XIII that the number of certificates based on college training issued to negro teachers has been over 400 each of the past two years. It seems safe to assume that an average of 400 Graduate State certificates per year will be issued during the next four years. At this rate by 1938 there will be 1600 additional college trained teachers available to replace the 1037 teachers now certificated on examination. This estimate allows for about 500 additional teachers for replacement and increase of positions.

It can be noted from Table XIII that of the 1037 valid certificates based on examination now held by negro teachers 292 are Third Grades, 569 are Second Grades and 100 are First Grades, none of which have any pre-examination training requirement. The other 76 certificates are of the several types which do require a minimum of high school graduation. Again, let us assume that certification of negro teachers on the basis of college training shall continue at the rate maintained the past two years. On that assumption we can predict that by 1935-36 all teachers holding Third Grade certificates can be replaced by college graduates and by 1938 there will be enough certificated negro college graduates to fill all teaching positions in the negro schools of the state.

### JEANES FUND

The Anna T. Jeanes Foundation helps counties employ trained, experienced, tactful, resourceful, and sympathetic negro women to help improve the negro schools in the county. These women are known as Jeanes Supervisors, Jeanes Teachers, Visiting Teachers or Industrial Teachers. They help the county superintendent by delivering supplies to schools; checking on registers and reports; observing and improving the teaching; reporting delinquents; helping teachers and patrons to improve school-houses, grounds, toilets and water supply. Table XV shows the disbursement of aid from the Jeanes Fund for the biennium 1932-34.

### SLATER FUND

Lack of adequate high schools for negroes has been discussed elsewhere in this report. Years ago when high schools for white children were in their incipency the trustees of the John F. Slater Fund realized that school authorities would hardly provide high schools for negroes. Yet high schools were needed to prepare grammar school children for college and prepare teachers. In order to meet the need the Slater Fund induced school authorities to add higher grades to the best negro schools in the county and call it the County Training School. The fund gave aid on teachers' salaries, extension of term, and purchase of equipment for this school. In this manner the school became an accredited high school. Table XVI shows the disbursement of aid from the Slater Fund for the biennium 1932-34.

**STATUS OF NEGRO SCHOOLS BY COUNTIES**

A brief summary regarding findings during visits to the negro schools in each county is given herewith.

In 1932-33 Alachua County had 48 negro schools, of which 29 had one teacher, 9 had two teachers, 5 had three teachers, and 4 had five or more teachers. The enrollment was 4051 with 35% in the first grade. The attendance in school was reported to be 86%. A count of children present during visits made in 1933-34 showed 69% in attendance. The per capita cost of instruction based on teachers' salaries was \$6.38. The average annual salary paid teachers was \$237. The county employed 109 teachers who possessed training as follows: 13 college graduates, 17 normal school graduates, 66 high school graduates, and 13 less than high school graduation. The teachers held certificates as follows: 19 high grade certificates granted on training, 38 low grade certificates granted upon examination, and 45 temporary or no certificates. The amount invested in lots, buildings and equipment was \$181,540, an average of \$44.81 per child. The county provided 44 schoolhouses, and 4 churches were provided by the negroes and used by the county for school purposes. Twenty schools had no water supply and 2 schools had no toilets.

In 1932-33 Baker County had 4 negro schools, of which 1 had one teacher, 1 had two teachers, and 2 had three teachers. The enrollment was 364 with 46% in the first grade. The attendance in school was reported to be 82%. A count of children present during visits in 1933-34 showed 47% in attendance. The per capita cost of instruction based on teachers' salaries was \$7.58. The average annual salary paid teachers was \$307. The county employed 9 teachers who possessed training as follows: 4 college graduates, 3 normal school graduates, 1 high school graduate, and 1 less than high school graduation. The teachers held certificates as follows: 1 high grade certificate based on training, 7 low grade certificates granted on examination; and 1 temporary or no certificate. The County had an investment of \$1,625 in lots, buildings and equipment, an average of \$4.46 per child. The county provided 4 schoolhouses. Two schools had no toilets.

In 1932-33 Bay County had 13 negro schools, of which

10 had one teacher; 2 had two teachers; and 1 had six teachers. The enrollment was 748 with 41% in the first grade. The attendance in the schools was reported to be 82%. A count of children present during visits in 1933-34 showed 69% in attendance. The per capita cost of instruction based on teachers' salaries was \$4.36. The average annual salary paid teachers was \$163. The county employed 20 teachers who possessed training as follows: 2 college graduates; 8 high school graduates; and 10 less than high school graduation. The teachers held certificates as follows: 2 high grade certificates granted on training and 18 low grade certificates granted on examination. The county had an investment of \$6,475 in lots, buildings and equipment, an average of \$8.65 per child. The county provided 6 schoolhouses, while the negroes provided 7 churches that were used for school purposes. There was no water supply in 9 schools and 2 schools had no toilets.

In 1932-33 Bradford County had 11 negro schools of which 8 had one teacher; 1 had two teachers; 1 had four teachers and 1 had five teachers. The enrollment was 720 children with 39% in the first grade. The attendance in the schools was reported to be 83%. A count of children present during visits in 1933-34 showed 50% attendance. The per capita cost of instruction based on teachers' salaries was \$4.82. The average annual salary paid teachers was \$182. The county employed 19 teachers who possessed training as follows: 2 college graduates; 2 normal school graduates; 3 high school graduates; and 12 less than high school graduation. The teachers held certificates as follows: 7 low grade certificates granted on examination and 12 temporary or no certificates. The county had an investment of \$8,145 in lots, buildings and equipment, an average of \$11.31 per child. The county provided 11 buildings. No water supply was found in 6 schools and 4 schools had no toilets.

In 1932-33 Brevard County had 7 negro schools, of which 3 had two teachers; 1 had three teachers, and 3 had five or more teachers. The enrollment was 1080, with 31% in the first grade. The attendance in the schools was reported to be 84%. The per capita cost of instruction based on teachers' salaries was \$12.02. The average annual salary paid teachers was \$371. The county em-

ployed 35 teachers who possessed training as follows: 6 college graduates; 9 normal school graduates; 17 high school graduates; and 3 less than high school graduation. The teachers held certificates as follows: 14 high grade certificates granted on training and 18 low grade certificates granted on examination. The county had an investment in lots, buildings and equipment of \$49,100, an average of \$45.46 per child. The county provided 7 schoolhouses.

In 1932-33 Broward County had 7 negro schools of which 2 had one teacher, 1 had three teachers; 2 had four teachers and 2 had five or more teachers. The enrollment was 1964 with 39% in the first grade. The attendance in the schools was reported to be 72%. The per capita cost of instruction based on teachers' salaries was \$5.50. The average annual salary paid teachers was \$340. The county employed 30 teachers who possessed training as follows: 6 college graduates; 6 normal school graduates and 18 high school graduates. The teachers held certificates as follows: 4 high grade certificates based on training and 20 low grade certificates based on examination. The county had an investment in lots, buildings and equipment of \$55,745 an average of \$28.38 per child. The county provided 7 schoolhouses.

In 1932-33 Calhoun County had 8 negro schools of which 6 had one teacher and 1 had three teachers. The enrollment was 344 children with 45% in the first grade. The attendance in the schools was reported to be 69%. A count of children present during visits in 1933-34 showed 65% in attendance. The per capita cost of instruction based on teachers' salaries was \$5.37. The average annual salary paid teachers was \$168. The county employed 11 teachers all of whom had training less than high school graduation. The teachers held certificates as follows: 4 low grade certificates granted on examination; and 6 temporary or no certificates. The county has provided no lots, building and equipment for negroes. The negroes provide 8 churches which are used by the county for school purposes. There was no water supply at 7 schools and 2 schools had no toilets.

In 1932-33 Charlotte County had 2 negro schools of which 1 had one teacher and 1 had three teachers. The

enrollment was 141 with 36% in the first grade. The attendance in the schools was reported to be 93%. The per capita cost of instruction based on teachers' salaries was \$12.91. The average annual salary paid teachers was \$455. The county employed 4 teachers who possessed training as follows: 2 normal school graduates and 2 high school graduates. The teachers held certificates as follows: 2 held high grade certificates granted on training and 2 held low grade certificates granted on examination. The county had invested in lots, buildings and equipment the sum of \$2,700, an average of \$19.14 per child. The county owns 2 school buildings.

In 1932-33 Citrus County had 8 negro schools of which 5 had one teacher; 2 had two teachers and 1 had three teachers. The enrollment was 352 with 36% in the first grade. The attendance in the schools was reported to be 86%. A count of children present during the visits in 1933-34 showed 49% attendance. The per capita cost of instruction based on teachers' salaries was \$9.16. The average annual salary paid teachers was \$269. The county employed 12 teachers who possessed training as follows: 11 high school graduates and 1 less than high school graduation. The teachers held certificates as follows: 12 low grade certificates based on examination. The county had invested in lots, buildings and equipment the amount of \$7,520, an average of \$21.36 per child. The county provided 4 schoolhouses and the negroes provided 4 churches used as schoolhouses. Four schools had no water supply and 2 schools had no toilets.

In 1932-33 Clay County had 6 negro schools of which 5 had one teacher, and 1 had seven teachers. The enrollment was 379 with 39% in the first grade. The attendance was reported to be 89%. A count of children present during visits in 1933-34 showed 63% attendance. The per capita cost of instruction based on teachers' salaries was \$14.56. The average annual salary paid teachers was \$460. There were 12 teachers employed who possessed training as follows: 3 college graduates, 4 normal school graduates, 2 high school graduates, and 3 less than high school graduation. The teachers held certificates as follows: 3 high grade certificates granted on training and 9 low grade certificates granted on examination. The county had an investment of \$9,460 in lots,

5

buildings and equipment, an average of \$24.96 per child. The county provided 5 schoolhouses and one church was provided by the negroes and used by the county. Four schools had no water supply and one school had no toilet.

In 1932-33 Collier County had one negro school, employing one teacher. The school had 68 children enrolled with 42% in the first grade. The per capita cost of instruction based on teachers' salary was \$5.88. The average annual salary was \$400. The negro church building was used for a schoolhouse.

In 1932-33 Columbia County had 26 negro schools of which 15 had one teacher; 7 had two teachers; 3 had three teachers, and 1 had five or more teachers. The enrollment was 1904 with 43% in the first grade. The attendance in the schools was reported to be 70%. A count of children present during visits in 1933-34 showed 59% attendance. The per capita cost of instruction based on teachers' salaries was \$7.30. The average annual salaries paid teachers was \$267. There were 52 teachers employed who possessed training as follows: 1 college graduate; 2 normal school graduates; 7 high school graduates, and 42 less than high school graduation. The teachers held certificates as follows: 1 high grade certificate granted on training; 29 low grade certificates granted on examination, and 22 temporary or no certificates. The county had \$48,456 invested in lots, building and equipment, an average of \$25.44 per child. The county provided 25 schoolhouses while the negroes provided 1 church which was used for a schoolhouse. Four schools had no water supply and 5 had no toilets.

In 1932-33 Dade County had 13 negro schools of which 3 had one teacher; 1 had two teachers; 2 had four teachers and 7 had five or more teachers. The enrollment was 6940 with 31% in the first grade. The attendance in the schools was reported to be 80%. The per capita cost of instruction based on teachers' salaries was \$13.38. The average annual salary paid teachers was \$704. There were 132 teachers employed who possessed training as follows: 46 college graduates; 77 normal school graduates and 9 high school graduates. The teachers held certificates as follows: 114 high grade certificates granted on

training, and 18 low grade certificates granted on examination. The county had an investment of \$666,755 in lots, buildings and equipment, an average of \$96.07 per child. The county provided 13 school buildings.

In 1932-33 DeSoto County had 3 negro schools of which 2 had one teacher, and 1 had nine teachers. There were 438 children enrolled with 28% in the first grade. The attendance in the schools was reported to be 89%. The per capita cost of instruction based on teachers' salaries was \$6.05. The average annual salary paid teachers was \$242. There were 11 teachers employed who possessed training as follows: 3 normal school graduates; 7 high school graduates, and 1 less than high school graduation. The teachers held certificates as follows: 6 low grade certificates granted on examination, and 3 temporary or no certificates. The county had \$1,100 invested in equipment, an average of \$2.51 per child. The county owns no buildings. Three churches are furnished by the negroes and used by the county.

In 1932-33 Dixie County had 5 negro schools, of which 4 had one teacher, and 1 have five or more teachers. There were 307 children enrolled with 30% in the first grade. The attendance in the schools was reported to be 89%. The per capita cost of instruction based on teachers' salaries was \$13.18. The average annual salary paid teachers was \$449. Nine teachers were employed who possessed training as follows: 3 college graduates and 5 high school graduates. The teachers held certificates as follows: 4 high grade certificates granted on training; 1 low grade certificate granted on examination, and 4 temporary or no certificates. The county had an investment of \$700 in lots, buildings and equipment, an average of \$2.28 per child. Two schoolhouses were provided by the county while the negroes provided 3 churches which were used by the county as schoolhouses.

In 1932-33 Duval County had 38 negro schools of which 20 had one teacher; 7 had two teachers, and 11 had five or more teachers. There was an enrollment of 10,805 with 28% in the first grade. The attendance in the schools was reported to be 80%. The per capita cost of instruction based on teachers' salaries was \$11.76. The average annual salary paid teachers was \$469. There were 271

teachers employed who possessed training as follows: 43 college graduates; 137 normal school graduates; 84 high school graduates, and 7 less than high school graduation. The teachers held certificates as follows: 148 high grade certificates granted on training; 95 low grade certificates granted on examination, and 1 temporary or no certificate. The county had \$626,620 invested in lots, building and equipment, an average of \$57.99 per child. The county provided 27 schoolhouses, and 11 churches were provided by the negroes and used by the county. Twenty-one schools had no water supply and 2 schools had no toilets.

In 1932-33 Escambia County had 23 negro schools, of which 15 had one teacher; 1 had two teachers; 1 had three teachers; and 5 had five or more teachers. The enrollment was 3051 with 24% in the first grade. The attendance in the schools was reported to be 91%. A count of children during the visits in 1933-34 showed 67%. The per capita cost of instruction based on teachers' salaries was \$9.18. The average annual salary paid teachers was \$400. There were 79 teachers employed who possessed training as follows: 23 college graduates; 32 normal school graduates; 20 high school graduates, and 4 less than high school graduation. The teachers held certificates as follows: 55 high grade certificates granted on training, and 24 low grade certificates granted on examination. The county had \$103,745 invested in lots, buildings and equipment, an average of \$34. per child. The county provided 15 schoolhouses and the negroes provided 8 churches which were used by the county as schoolhouses. Nine schools had no water supply and 2 schools had no toilets.

In 1932-33 Flagler County had 6 negro schools, of which 5 had one teacher, and 1 had two teachers. There were 242 children enrolled with 41 per cent in the first grade. The attendance in the schools was reported to be 71%. The per capita cost of instruction based on teachers' salaries was \$6.92. The average annual salary paid teachers was \$239. There were 7 teachers employed who possessed training as follows: 4 normal school graduates and 3 high school graduates. The teachers held certificates as follows: 2 low grade certificates granted on examination and five temporary or no certificates. The

county had provided neither buildings nor equipment for the negro schools. Six churches were provided by the negroes and used by the county for school purposes.

The attendance was reported to be 90%. The per capita cost of instruction based on teachers' salaries was \$12.86. The average annual salary paid teachers was \$419. The county employed 11 teachers who possessed training as follows: 6 college graduates, 3 normal school graduates and 2 high school graduates. The teachers held certificates as follows: 4 high grade certificates granted on the basis of training and 7 low grade certificates granted on examination. The county had an investment of \$19,031 in lots, buildings and equipment, an average of \$52.57 per child. The county provided 2 schoolhouses and 4 churches were provided by the negroes and used by the county for school purposes.

In 1932-33 Monroe County had 1 negro school employ-

ing 14 teachers. The enrollment was 532 with 20% in the first grade. The attendance in school was reported to be 79%. The per capita cost of instruction based on teachers' salaries was \$12.23. The average annual salary paid teachers was \$465. The teachers possessed training as follows: 2 college graduates, 1 normal school graduate, 9 high school graduates, and 2 less than high school graduation. The teachers held certificates as follows: 3 high grade certificates granted on training, 7 low grade certificates granted upon examination, and 4 temporary or no certificates. The county had an investment of \$35,325 in lots, buildings and equipment, an average of \$66.40 per child. The county provided 2 schoolhouses for negroes.

In 1932-33 Nassau County had 15 negro schools, of which 13 had one teacher, 1 had three teachers, and 1 had fifteen teachers. The enrollment was 849 with 33% in the first grade. The attendance in school was reported to be 77%. A count of children during visits made in 1933-34 showed 72% attendance. The per capita cost of instruction based on teachers salaries was \$5.15. The average annual salary paid teachers was \$141. The county employed 31 teachers who possessed training as follows: 7 college graduates, 8 normal school graduates, 10 high school graduates and 6 less than high school graduation. The teachers held certificates as follows: 10 high grade certificates granted on training, 20 low grade certificates granted upon examination, and 1 temporary or no certificate. The county had an investment of \$67,695 in lots, buildings and equipment, an average of \$79.73 per child. The county furnished 14 schoolhouses and 1 church was furnished by the negroes and used by the county for school purposes. Twelve schools had no water supply and three schools had no toilets.

In 1932-33 Okaloosa County had 6 negro schools, of which 4 had one teacher, and 2 had two teachers. The enrollment was 248 with 37% in the first grade. The attendance in school was reported to be 76%. A count of children present during visits made in 1933-34 showed 67% in attendance. The per capita cost of instruction based on teachers' salaries was \$8.05. The average annual salary paid teachers was \$350. The county employed 8 teachers who possessed training as follows: 3 high school

graduates, and 5 less than high school graduation. The teachers held certificates as follows: 7 low grade certificates granted upon examination and 1 temporary or no certificate. The county provided 6 schoolhouses. Five schools had no water supply.

In 1932-33 Okeechobee County had 2 negro schools, of which 1 had one teacher and 1 had two teachers. The enrollment was 151 with 44% in the first grade. The attendance in school was reported to be 72%. The per capita cost of instruction based on teachers' salaries was \$7.24. The average annual salary paid teachers was \$364. The teachers possessed training as follows: 2 high school graduates and 1 less than high school graduation. The teachers held 2 low grade certificates granted upon examination and 1 temporary or no certificate. The county had \$900 invested in lots, buildings and equipment, an average of \$5.96 per child. One schoolhouse was provided by the county and one church provided by the negroes for school purposes.

In 1932-33 Orange County had 14 negro schools, of which 8 had one teacher, 1 had two teachers, 2 had three teachers, 1 had four teachers, and 2 had five or more teachers. The enrollment was 2655 with 29% in the first grade. The attendance in school was reported to be 87%. The per capita cost of instruction based on teachers' salaries was \$11.47. The average annual salary paid teachers was \$476. The county employed 64 teachers who possessed training as follows: 14 college graduates, 17 normal school graduates, 24 high school graduates, and 9 less than high school graduation. The teachers held certificates as follows: 27 high grade certificates based on training, 35 low grade certificates granted upon examination, and 2 temporary or no certificates. The county had an investment of \$287,190 in lots, buildings and equipment, an average of \$108.16 per child. The county owns 14 schoolhouses.

In 1932-33 Osceola County had 6 negro schools, of which 5 had one teacher, and 1 had five teachers. The enrollment was 336 with 33% in the first grade. The attendance in school was reported to be 89%. The per capita cost of instruction based on teachers' salaries was \$10.46. The average annual salary paid teachers was \$352. The

county employed 10 teachers who possessed training as follows: 2 college graduates, 4 high school graduates, and 4 less than high school graduation. The teachers held certificates as follows: 2 high grade certificates based on training, 6 low grade certificates granted upon examination, and 2 temporary or no certificates. The county had an investment of \$12,650 in lots, buildings and equipment, an average of \$37.64 per child. The county owns 3 negro schoolhouses.

In 1932-33 Palm Beach County had 11 negro schools, of which 1 had one teacher, 3 had two teachers, 1 had three teachers, 3 had four teachers, and 3 had five or more teachers. The enrollment was 3095 with 31% in the first grade. The attendance was reported to be 82%. The per capita cost of instruction based on teachers' salaries was \$13.12. The average annual salary paid teachers was \$625. The county employed 65 teachers who possessed training as follows: 15 college graduates, 33 normal school graduates, 14 high school graduates, and 3 less than high school graduation. The teachers held certificates as follows: 48 high grade certificates based on training, and 17 low grade certificates granted upon examination. The county had an investment of \$204,014 in lots, buildings and equipment, an average of \$65.91 per child. The county owns 11 negro schoolhouses.

In 1932-33 Pasco County had 10 negro schools, of which 7 had one teacher, 1 had two teachers, 1 had three teachers and 1 had five teachers. The enrollment was 477 with 40% in the first grade. The attendance was reported to be 79%. A count of children during visits made in 1933-34 showed attendance to be 63%. The per capita cost of instruction based on teachers' salaries was \$11.65. The average annual salary paid teachers was \$327. The county employed 17 teachers who possessed training as follows: 3 college graduates, 4 high school graduation, and 10 less than high school graduation. The teachers held certificates as follows: 2 high grade certificates based on training, and 15 low grade certificates granted upon examination. The county had an investment of \$5,020 in lots, buildings and equipment, an average of \$10.20 per child. The county owns 2 schoolhouses and the negroes provide 8 churches which the county uses for school purposes. Eight schools had no water supply and 4 schools had no toilets.

In 1932-33 Pinellas County had 9 negro schools, of which 1 had one teacher, 1 had two teachers, 2 had three teachers, and 5 had five or more teachers. The enrollment was 2790 with 23% in the first grade. The attendance was reported to be 91%. A count of children present during visits made in 1933-34 showed 65% in attendance. The per capita cost of instruction based on teachers' salaries was \$13.58. The average annual salary paid teachers was \$583. The county employed 65 teachers who possessed training as follows: 14 college graduates, 47 normal school graduates, and 4 high school graduates. The teachers held certificates as follows: 34 high grade certificates based on training, and 31 low grade certificates granted upon examination. The county had an investment of \$244,330 in lots, buildings and equipment, an average of \$87.57 per child. The county owned 8 schoolhouses and one church was provided by the negroes and used for school purposes.

In 1932-33 Polk County had 26 negro schools, of which 10 had one teacher, 5 had two teachers, 4 had three teachers, and 7 had five or more teachers. The enrollment was 3956 with 32% in the first grade. The attendance in school was reported to be 87%. A count of children present during visits made in 1933-34 showed 78% attendance. The per capita cost of instruction based on teachers' salaries was \$7.06. The average annual salary paid teachers was \$241. The county employed 116 teachers who possessed training as follows: 25 college graduates, 33 normal school graduates, 48 high school graduates, and 10 less than high school graduation. The teachers held certificates as follows: 41 high grade certificates based on training, 65 low grade certificates granted upon examination, and 10 temporary or no certificates. The county had an investment of \$226,235 in lots, buildings and equipment, an average of \$57.18 per child. The county provided 18 schoolhouses and the negroes provided 8 churches which the county used for school purposes. Three schools had no water supply.

In 1932-33 Putnam County had 25 negro schools, of which 19 had 1 teacher, 2 had two teachers, 2 had three teachers, and 2 had five or more teachers. The enrollment was 1737 with 32% in the first grade. The attendance in schools was reported to be 81%. A count of

children present during visits made in 1933-34 showed 61% attendance. The per capita cost of instruction based on teachers' salaries was \$9.09. The average annual salary paid teachers was \$292. The county employed 54 teachers who possessed training as follows: 6 college graduates, 14 normal school graduates, 25 high school graduates, and 9 less than high school graduation. The teachers held certificates as follows: 18 high grade certificates based on training, 11 low grade certificates granted upon examination, and 25 temporary or no certificates. The county had an investment of \$47,865 in lots, buildings and equipment, an average of \$27.55 per child. The county owned 25 schoolhouses. Ten schools had no water supply and 10 schools had no toilets.

In 1932-33 St. Johns County had 15 negro schools, of which 9 had one teacher, 1 had two teachers, 2 had three teachers, and 3 had five or more teachers. The enrollment was 1813 with 30% in the first grade. The attendance in school was 87%. A count of children present during visits made in 1933-34 showed 53% in attendance. The per capita cost of instruction based on teachers' salaries was \$14.90. The average annual salary paid teachers was \$429. The county employed 63 teachers who possessed training as follows: 9 college graduates, 24 normal school graduates, 25 high school graduates, and 5 less than high school graduation. The teachers held certificates as follows: 27 high grade certificates based on training, 33 low grade certificates granted upon examination, and 5 temporary or no certificates. The county had an investment of \$126,990 in lots, buildings and equipment, an average of \$70.04 per child. The county provided 5 schoolhouses and the negroes provided 10 churches, lodges or shacks which were used by the county for school purposes. Eight schools had no water supply and 1 school had no toilets.

In 1932-33 St. Lucie County had 3 negro schools, of which 2 had one teacher, and 1 had nineteen teachers. The enrollment was 754 with 25% in the first grade. The attendance in school was reported to be 78%. The per capita cost of instruction based on teachers' salaries was \$13.40. The average annual salary paid teachers was \$481. The county employed 21 teachers who possessed training as follows: 19 college graduates, and 2 high school graduates. The teachers held certificates as fol-

lows: 19 high grade certificates based on training, and 2 low grade certificates granted upon examination. The county had an investment of \$37,385 in lots, buildings and equipment, an average of \$49.58 per child. The schoolhouses were provided by the county.

In 1932-33 Santa Rosa County had 12 negro schools, of which 8 had one teacher, 2 had two teachers, 1 had three teachers, and 1 had five teachers or more. The enrollment was 622 with 39% in the first grade. The attendance in school was reported to be 77%. A count of children present during visits in 1933-34 showed 68% in attendance. The per capita cost of instruction based on teachers' salaries was \$5.75. The average annual salary paid teachers was \$188. The county employed 19 teachers who possessed training as follows: 5 normal school graduates, 7 high school graduates, and 7 less than high school graduation. The teachers held certificates as follows: 3 high grade certificates based on training, 4 low grade certificates granted upon examination, and 12 temporary or no certificates. The county had an investment of \$1688 in lots, buildings and equipment, an average of \$2.71 per child. The county provided 3 schoolhouses and the negroes provided 9 churches which the county used for school purposes. Nine schools had no water supply and 4 schools had no toilets.

In 1932-33 Sarasota County had 3 negro schools, of which 1 had one teacher, 1 had two teachers, and 1 had nine teachers. The enrollment was 476 with 31% in the first grade. The attendance in school was reported to be 90%. The per capita cost of instruction based on teachers' salaries was \$7.66. The average annual salary paid teachers was \$298. The county employed 12 teachers who possessed training as follows: 3 college graduates, 3 normal school graduates, and 6 high school graduates. The teachers held certificates as follows: 6 high grade certificates based on training, and 6 low grade certificates granted upon examination. The county had an investment of \$7,070 in lots, buildings and equipment, an average of \$16.13 per child. The county owned 2 schoolhouses and the negroes furnished one church for school purposes.

In 1932-33 Seminole County had 13 negro schools, of

which 8 had one teacher, 1 had two teachers, 2 had three teachers, and 2 had five or more teachers. The enrollment was 2181 with 39% in the first grade. The attendance in schools was reported to be 80%. The per capita cost of instruction based on teachers' salaries was \$8.95. The average salary paid teachers was \$383. The county employed 51 teachers who possessed training as follows: 7 college graduates, 15 normal school graduates, 25 high school graduates, and 4 less than high school graduation. The teachers held certificates as follows: 12 high grade certificates based on training, 26 low grade certificates granted upon examination, and 13 temporary or no certificates. The county had an investment of \$126,145 invested in lots, buildings and equipment, an average of \$57.83 per child. The county owned 12 schoolhouses and 1 church was provided by the negroes and used for school purposes.

In 1932-33 Sumter County had 8 negro schools, of which 2 had 1 teacher, 2 had two teachers, 2 had three teachers and 2 had four teachers. The enrollment was 774 with 40% in the first grade. The attendance in school was reported to be 77%. A count of children present during visits in 1933-34 showed 55% in attendance. The per capita cost of instruction based on teachers' salaries was \$11.62. The average annual salary paid teachers was \$457. The county employed 20 teachers who possessed training as follows: 2 college graduates, 3 normal school graduates, 14 high school graduates, and 1 less than high school graduation. The teachers held certificates as follows: 7 low grade certificates granted upon examination and 13 temporary or no certificates. The county had an investment of \$11,550 in lots, buildings and equipment, an average of \$14.92 per child. The county owned 8 schoolhouses. Four schools had no water supply and one school had no toilets.

In 1932-33 Suwannee County had 26 negro schools, of which 20 had one teacher, 5 had two teachers, and 1 had five or more teachers. The enrollment was 1596 with 37% in the first grade. The attendance in school was reported to be 74%. A count of children present during visits made in 1933-34 showed 56% in attendance. The per capita cost of instruction based on teachers' salaries was \$6.72. An average annual salary paid teachers was

\$282. The county employed 38 teachers who possessed training as follows: 7 college graduates, 4 normal school graduates, 21 high school graduates, and 6 less than high school graduation. The teachers held certificates as follows: 5 high grade certificates based on training, 8 low grade certificates granted upon examination, and 25 temporary or no certificates. The county had an investment of \$29,185 in lots, buildings and equipment, an average of \$18.28 per child. The county provided 14 schoolhouses and the negroes provided 12 churches, lodges, or shacks which the county used for school purposes. Twenty-four schools had no water supply, and 2 schools had no toilets.

In 1932-33 Taylor County had 8 negro schools, of which 4 had one teacher, 2 had two teachers, 1 had three teachers, and 1 had five or more teachers. The enrollment was 776 with 44% in the first grade. The attendance in school was reported to be 80%. A count of children present during visits made in 1933-34 showed 65% in attendance. The per capita cost of instruction based on teachers' salaries was \$6.40. The average annual salary paid teachers was \$216. The county employed 23 teachers who possessed training as follows: 2 college graduates, 2 normal school graduates, 13 high school graduates, and 6 less than high school graduation. The teachers held certificates as follows: 5 low grade certificates granted on examination, and 18 temporary or no certificates. The county had an investment of \$7,100 in lots, building and equipment, an average of \$9.14 per child. The county provided 2 schoolhouses and the negroes provided 6 churches, lodges or shacks which were used for school purposes. Five schools had no water supply and 3 schools had no toilets.

In 1932-33 Union County had 7 negro schools, of which 5 had one teacher, and 2 had two teachers. The enrollment was 366 with 47% in the first grade. The attendance in school was reported to be 78%. A count of children during visits in 1933-34 showed 34% in attendance. The per capita cost of instruction based on teachers' salaries was \$5.36. The average annual salary paid teachers was \$218. The county employed 9 teachers who possessed training as follows: 1 high school graduate and 8 less than high school graduation. Every teacher was

teaching on a temporary or no certificate. The county had an investment of \$3,565 in lots, buildings and equipment, an average of \$9.74 per child. The county provided 7 negro schoolhouses.

In 1932-33 Volusia County had 20 negro schools, of which 11 had one teacher, 4 had two teachers, and 5 had five or more teachers. The enrollment was 3347 with 26% in the first grade. The attendance in school was reported to be 85%. A count of children present during visits made in 1933-34 showed 68% in attendance. The per capita cost of instruction based on teachers' salaries was \$12.65. The average annual salary paid teachers was \$437. The county employed 97 teachers who possessed training as follows: 15 college graduates, 43 normal school graduates, 33 high school graduates, and 6 less than high school graduation. The teachers held certificates as follows: 46 high grade certificates based on training, and 42 low grade certificates granted upon examination. The county had an investment of \$272,185 in lots, buildings and equipment, an average of \$81.32 per child. The county provided 16 negro schoolhouses and the negroes provided 4 churches which were used by the county for school purposes. Ten schools had no water supply.

In 1932-33 Wakaulla County had 18 negro schools, of which 13 had one teacher, 3 had two teachers and 2 had three teachers. The enrollment was 778 with 33% in the first grade. The attendance in school was reported to be 66%. A count of children present during visits made in 1933-34 showed 64% attendance. The per capita cost of instruction based on teachers' salaries was \$6.09. The average annual salary paid teachers was \$197. The county employed 24 teachers who possessed training as follows: 1 college graduate, 9 high school graduates, and 14 less than high school graduation. The teachers held certificates as follows: 1 high grade certificate based on training, 6 low grade certificates granted upon examination, and 17 temporary or no certificates. The county had an investment of \$9,135 in lots, buildings and equipment, an average of \$11.70 per child. The county provided 9 schoolhouses and the negroes provided 9 churches, lodges or shacks which were used by the county for school purposes. Seventeen schools had no water supply and 8 schools had no toilets.

## DEPARTMENT OF PUBLIC INSTRUCTION

In 1932-33 Walton County had 10 negro schools, of which 6 had one teacher, 3 had two teachers, and 1 had five or more teachers. The enrollment was 672 with 31% in the first grade. The attendance was reported to be 81%. A count of children present during a visit in 1933-34 showed 78% in attendance. The per capita cost of instruction based on teachers' salaries was \$7.22. The average annual salary paid teachers was \$255. The county employed 19 teachers who possessed training as follows: 6 college graduates, 2 normal school graduates, 7 high school graduates, and 4 less than high school graduation. The teachers held certificates as follows: 2 high grade certificates based on training, 15 low grade certificates granted upon examination, and 2 temporary or no certificates. The county had an investment of \$12,545 in lots, buildings and equipment, an average of \$18.86 per child. The county provided 8 schoolhouses and the negroes provided 2 churches which were used by the county for school purposes.

In 1932-33 Washington County had 12 negro schools, of which 8 had one teacher, 2 had two teachers, and 2 had three teachers. The enrollment was 772 with 38% in the first grade. The attendance in school was reported to be 73%. A count of children present during visits made in 1933-34 showed 58% in attendance. The per capita cost of instruction based on teachers' salaries was \$4.34. The average annual salary paid teachers was \$187. The county employed 18 teachers who possessed training as follows: 6 high school graduates, and 12 less than high school graduation. The teachers held certificates as follows: 18 low grade certificates granted upon examination. The county had an investment of \$2,548 in lots, buildings and equipment, an average of \$3.28 per child. The county provided 12 schoolhouses.

## CHAPTER V

---

### TRADE AND INDUSTRIAL EDUCATION 1932-34

The 1930 Federal census shows 465,000 persons engaged in industrial occupations in Florida. Of this number the majority are not producing with the ease, satisfaction or ability of which they are potentially capable. Their inefficiency in their present jobs, their chances of adjustment in a changing industrial order and their chances of promotion are affected by a deficiency possible of favorable change through some phase of our educational program. Since they are engaged in the industrial occupations it is reasonable to assume that the training most needed is that which is designed to extend their working knowledge and skills in the occupations at which they work; or that which will provide preparation for entrance and work in the occupation which they choose or will enter at a later date.

Our working population has faced well known difficulties during the biennium. Employment has been at low ebb, and with reductions of family income and purchasing power even to the extent of bare necessities, there has been a corresponding pessimistic attitude toward extension and job adjustment training.

The sentiment of the general public has been to give job preference to the older men or those with dependents. To the youth, and that part of our industrial training program normally maintained for the purpose of increasing the civic and vocational ability of the juvenile worker, this sentiment and its effect has been somewhat discouraging. Normally with improvement in our vocational teaching personnel and organization the enrollment of young workers in our continuation schools should have shown a great increase. With conditions as they are it is encouraging to report that the enrollment has increased.

Two conditions have been present with the trade pre-

paratory training. On the one hand it has been considered inexpedient to train young men and women for industrial jobs which do not exist; on the other hand boys and girls are growing into manhood and womanhood and are in the position of dire need of marketable knowledge and skills. An effort has been made to control the training by a close cooperation with employer and labor groups avoiding miscellaneous production of young mechanics without regard for whether they can be consumed by the trades and industries in the communities.

The conditions just named have prompted the organization of short units of training for specific jobs such as the service jobs in hotels, etc. Many such jobs have heretofore been filled by imported help while our own people able in every sense but lacking the special training went without work and many times without adequate subsistence. During the last year of the biennium 1194 persons were trained for hotel jobs alone thus establishing a new payroll of approximately \$450,000 annually. Other group and individual cases have been approached and dealt with in similar manner. Such training has enabled the department to do its bit in relieving the unemployment in the State.

Further effort has been directed to the training of youth through a cooperative training program in one of the larger cities. High school students who had decided to enter a trade or an occupation immediately after high school graduation were inducted into the cooperative plan of training. Under this plan two hours are devoted to subjects required for high school graduation, four hours to actual working experience in an office, trade or business and two hours of study pertaining to the job at which the boy or the girl works. This type program automatically gives spread to the training beyond which the school can be expected to provide otherwise, and balances the number trained with the number probable of consumption by the occupations of the community.

Special courses have been provided for adult tradesmen to the end that they might become adjusted to changes of work caused by reduction of working forces in the various trades and industries, and in addition thereto that they might continue their growth in the trades by

acquisition of knowledge and skills beyond their present holdings.

Training for workers in public service has been expanded during the biennium. Conferences and training courses have been held with firemen, bus drivers, police and similar groups.

Improvement of the personnel employed in the direction of courses and programs during the two years has been more than normal. Many teachers have spent their summers in special study. Their professional improvement has been generally reflected in the State's program.

General readjustment of conditions, improvement of the employment situation, the advent of the Federal plan of apprentice training, a growing recognition of the values of specific occupational training, both preparatory and extension in type indicate that the normal increase of enrollment during the biennium will be greatly exceeded during the coming years.

Complete statements of the trades and industrial training as to enrollment, subjects and trades taught and State and Federal monies used as reimbursement to the counties participating are given by years in the following tables:

## SECTION VI

---

### BIENNIAL REPORT ON VOCATIONAL AGRICULTURAL EDUCATION 1932-1934

During the biennium the vocational agricultural education program in the State of Florida has held its own with regard to the number of departments in our high schools, and the efficiency of the work has continued to improve. This has been possible only through the loyal cooperation of the teachers of vocational agriculture in maintaining their departments and increasing the efficiency of their work, regardless of reductions in salaries.

An indication that the work of the vocational agriculture teachers in Florida ranks favorably with that of the teachers in other Southern States is the fact that the section of the Master Teacher Report relating to Supervised Practice, submitted by M. A. Baker Florida Master Teacher 1932-33, ranked first in the Southern Regional Master Teacher Contest. Mr. Maltby, Federal Agent for Agricultural Education, made this announcement of Mr. Baker's rating at the Southern Regional Conference held in Memphis last May.

The fact that even during periods of economic stress, like the present, the teachers of vocational agriculture support their professional organizations and publications indicate that they are concerned over their professional growth. Statistics show that the Florida vocational agriculture teachers, during the fiscal year, 1933-34, had the highest percentage, of subscriptions to the **Agriculture Education Magazine** of any State in the Union. The teachers also maintain a hundred percent membership in the Florida Vocational Agriculture Teachers Association, the Florida Vocational Association, and the American Vocational Association.

All of the vocational agriculture teachers are agricultural college graduates and hold graduate state certificates. Approximately one-fourth of this group also hold Master's degrees and the other three-fourths of the vocational agriculture teachers of the State have attended summer school working toward their Master's degree, taking courses especially designed by the teacher-training department for their professional improvement. The State Supervisor also attended summer school during the summer of 1934. He spent six weeks at the Colorado Agricultural College taking courses leading toward a Ph.D. degree in Agricultural Education.

In line with President Roosevelt's conservation program, we, in Florida, have through the medium of vocational agriculture classes and the Future Farmer Organization carried on educational work in all phases of forest conservation. This work was done under the direct supervision of the Florida Forest Service, whose staff has given us the fullest possible cooperation. As compensation for good work, a two weeks' camping trip on the Santa Fe River was offered by the Florida Forest Service to the outstanding teacher in each district and to the outstanding boy in each F. F. A. Chapter.

The Florida vocational agriculture teachers have given every possible cooperation in connection with the Recovery Program which is being sponsored by the Administration in Washington. In connection with the Agricultural Adjustment Act, the teachers of vocational agriculture informed the farmers in their respective patronage areas regarding the provisions of said Act, through the medium of evening classes. In addition to this service, the teachers of vocational agriculture located in counties where there was no county agent rendered an invaluable service in connection with the sign-up campaign on the following commodities: cotton, tobacco, corn, and hogs. The agriculture teachers also through personal contact and through evening classes explained to the farmers the functions of the Farm Credit Administration and rendered to the farmers every assistance possible in connection with their farm credit problems, even going so far as to assist in filling out applications for loans. Facts regarding the A. A. A., the F. C. A., etc., were included in the instruction given to both in-school and

out-of-school farm boys reached through all-day, day-unit and part-time classes.

The teachers have recognized the need for making adjustments in their programs to meet present emergencies. More attention has been given, particularly in highly specialized farming communities, to the importance of producing on the local farms sufficient vegetables, meats, fruits, eggs, and dairy products to feed the farm family.

Each teacher included in his program of work for the year 1933-34 an item on cooperation with the Beautification Division of the State Road Department. Mr. Prevatt, Director of Highway Beautification for the State Road Department, requested the teachers at the annual summer conference in 1933, to urge their boys to collect seeds of native Florida trees. These seeds were wanted for the purpose of making roadside plantings. The Future Farmers, under the direction of the agriculture teachers, gathered seeds of the yaupon, white oak, live oak, water oak, American holly, dahoon holly, dogwood, cypress, sweet gum, red cedar, cherry laurel, and many others. The boys were paid in proportion to the amount of seed gathered. One F. F. A. chapter received four hundred dollars (\$400.00).

When it was decided to place an Educational Adviser in each C. C. C. camp, the State Supervisor of Agricultural Education was requested by the State Superintendent of Public Instruction to work with the committee in preparing a list of available men qualified as Camp Educational Advisers. After the Advisers had been appointed to the twenty-six C. C. C. camps in Florida, it was deemed advisable to hold a week's conference of these Advisers at the University of Florida. The State Supervisor was requested to appear on the program and to assist in conducting this conference. On numerous occasions the Supervisor visited the individual Camp Educational Advisers, when in the vicinity of their camp, and rendered every possible assistance in connection with their respective programs. The State Supervisor has been appointed a member of the State Coordinating Committee on Educational Work in the C. C. C. camps.

The teacher-training work for white vocational agri-

culture teachers is carried on at the University of Florida, under Dr. E. W. Garris, as teacher-trainer. For negroes, this work is carried on at the Florida A. and M. College, with R. L. Reynolds, as teacher-trainer.

In both these teacher-training institutions the Seniors, or "trainees," do their practice teaching in regularly established high school departments of vocational agriculture under a regular teacher of vocational agriculture. An improvement in the facilities for carrying on practice teaching in connection with the teacher-training work at the University of Florida was made when the P. K. Yonge Laboratory School was opened. A separate well-equipped classroom and farm shop was provided in this high school building for the vocational agriculture department, which is to be used as the training center for white vocational agriculture teachers.

Each person taking instruction in vocational agriculture carried out, on his own farm, a supervised practice or project program under the supervision of his teacher. Accurate and up-to-date records are kept by each pupil. For the fiscal year, 1931-32, the labor income from the supervised practice program exceeded the entire cost of instruction by \$74,138.98; and for the fiscal year, 1932-33, by \$75,894.32. For every dollar invested in teachers' salaries from Federal, State and County funds during the fiscal year, 1932-33, the dividends earned by the labor income from the supervised practice was one dollar and sixty-cents.\*

The above data bear out the statement that vocational agricultural education in the State of Florida is worth what it costs.

The chief objective of vocational agriculture is to fit persons who take this instruction for efficient operation of the farm. To this end a report is made each year of what becomes of the boys who studied vocational agriculture and graduated from high school or dropped out of high school before they finished. Our record for the fiscal year, 1933-34, on white farm boys shows that of this group 63.2 per cent went into farming and 36.8 per cent into other lines of work. In the case of the negro boys,

\*Figures for 1933-34 not yet available.

82 per cent went into farming and 18 per cent into other lines of work.

This report would not be complete without a short statement about the Florida Association of Future Farmers of America, which is making commendable progress. During this fiscal year, 1933-34, we have increased the number of chartered chapters to 52 and the total paid membership to 1237 boys. This is approximately a 25% increase over the past year. Official delegates were sent to the National Convention of the Future Farmers of America in Kansas City. Our candidate for the American Farmer degree, Emerson Bishop of Aucilla, was duly elected and the degree conferred at this convention. Jacques Waller, of Plant City, won first place in the National Essay Contest sponsored by the American Royal Live Stock Show in Kansas City. The Homestead F. F. A. chapter won first place in the State, first place in the Southern Region, and fourth place in the National Chapter Contest. This honor carried with it a cash award of \$100.00, given by the National Association of Future Farmers of America.

A very successful State Convention of the Florida Association, Future Farmers of America, was held in Gainesville, June 4-5-6, 1934. The high lights of the State Convention were the public speaking contest and the banquet. We were honored by having Governor David Sholtz and Doctor John J. Tigert, President of the University of Florida, present at the banquet. They were both presented with honorary Planter keys. Governor Sholtz made the principal address of the evening.

At the present time our greatest need is increased appropriations by the State Legislature, at least to the point of matching Federal appropriations for vocational education, to the end that we may establish additional departments of vocational agriculture where there is a distinct need for same.

## CHAPTER VII

---

### HOME ECONOMICS EDUCATION

Curtailed school budgets and the wave of omitting "frills" and "fads" in the school curriculum have influenced the status of home economics in the public schools this biennium. In some communities administrators omitted home economics in the school curriculum to cut expenditures probably because home economics falls in the upper half of the high school subjects in their ranking according to instruction cost, and/or probably because they interpreted home economics as being less fundamental. This trend was evident the first part of the biennium, but during the past year there has been a counteracting trend. The communities that retained home economics, in many instances with much support from principals of schools and patrons, are stronger supporters than ever of the program.

After this weighing and measuring and economic paring, the loss and gain in home economics schools during the biennium about balances, probably favoring expansion, but the disturbed status had a wholesome influence on the program. A reappraisal of the program has come about and values in home economics education are being considered. Larger classes, equal to the number considered the maximum teaching load in other subjects, are recommended for home economics, providing the quarters are adequate and equipped for the number determined. Operating cost of home economics is being reduced by offering less time to food preparation and more time to selection and management of individual and family food problems, and the offering of instruction in other phases of homemaking.

There are greater opportunities than ever for the program to establish itself as a fundamental course in training for homemaking and home living. One factor which has strengthened home economics and vocational education generally is the Emergency Relief Program. Quali-

fied and successful home economics teachers have been called into service to carry on this program and to render assistance in the training of their workers.

During the latter part of the biennium there has been a scarcity of qualified home economics teachers (white and negro) to fill positions in schools.

Home economics training in schools and projects carried on in the home under supervision have contributed to the welfare of the families represented.

There is more than ever an evidence of a conscious effort on the part of many home economics teachers to get acquainted with home and community conditions and needs and to adapt home economics training to meet these conditions in as far as possible, and yet not depart too far from the prescribed course of study.

More schools apply each year for the vocational home economics program than funds permit for approval. The evening school program in home economics for adults has expanded in the number of centers offering courses, the number of classes, and in enrollment. The courses in demand show that there is an increasing interest in management and relationship problems in the home for the welfare of all the members of the family, and the selection of goods and services for the family at minimum cost. There is no difficulty in getting interest in teaching budgeting today if the teaching approach is on the basis of real expenditures from choices available in the community.

The construction problems in clothing were largely renovation of garments during the first part of the biennium. This past year shows that the supply of garments for renovation has been practically exhausted and the construction work is on new fabrics. There is also less construction going on in clothing classes and more emphasis placed on selection and care of clothing for good grooming at minimum cost, or management of the clothing budget for individual's or family's clothing.

There is much interest in adequate minimum cost diets and simple, quickly prepared meals. Fancy cookery is very unpopular, in fact, not tolerated when occasionally superimposed by the teacher, whereas a few years ago interest ran highest in the selection of these courses.

Parent education courses, including child development and family relationships, are increasing in demand. There is difficulty in locating leaders trained to teach these phases of homemaking and home living. These courses have been offered, however, in a few centers. The interest has been centered on the need of adjustment to present social and economic conditions, considering human values to be conserved and the importance of developing a philosophy of home living that is in harmony with family and community resources available. These courses have been "family centered" rather than "child centered." The child is considered as **one** member of the family in the best development of **all** members of the family.

There has been no increase in part time home economics programs in the state, but the enrollment has increased in the centers where this program is offered. The raising of the age level of children for employment is probably responsible for increased enrollment in part time classes this past year. The part time program is for girls 16 years of age or over who are employed or are "house daughters." They may attend classes one or more hours per day to one or more hours per week, depending on the time they can spare from their job or from home to receive instruction in home economics.

The interest trends in these courses do not vary from those of the day and evening school programs. The demand has been for more varied choice of courses to meet new needs that have arisen in the present economic order. Courses that are practical and that deal with real every day problems are the most popular.

### Teacher Training

The Florida State College for Women is the approved teacher-training institution for home economics.

The enrollment of home economics majors has increased considerably in the past biennium.

Each trainee during her senior year does practice teaching under supervision of forty sixty-minute lessons, for a consecutive eight-week period, and observes eighteen sixty-minute lessons in Leon High School or Florida High School. She also spends six weeks in residence in the Home Management House under the supervision of the

home economics staff, practicing the many homemaking jobs in family groups.

The State and Federal vocational funds participate in half of the salary of the Associate Professor of Home Economics Education and in some of the expense for travel to enable her to do some itinerant teacher-training in the interest of following up the girl's ability on the job and to acquaint herself with conditions in the field.

### **Home Economics Education for Negroes**

When the five-year State Plan for Vocational Education was revised in 1932, the training for vocational home economics teachers was increased to four years, leading to a B. S. degree from a teacher-training institution approved for vocational home economics. This is the result of recommendations of a group of people composed of the president and the dean of the School of Home Economics of the Florida A. & M. College, the State Agent for Negro Education, the Agent for Home Economics Education Service from the Federal Board for Vocational Education, and the State Supervisor of Home Economics Education. This requirement has improved the qualifications of all home economics teachers. Those having two years' training and doing satisfactory work were retained on the job provided they continued to study each summer for the attainment of a B. S. degree, but new teachers entering the vocational schools must be four-year college graduates from approved teacher-training institutions.

Despite the economic conditions which have not only reduced salaries but have caused them to be delinquent, the teachers are making efforts to improve themselves professionally by attending summer school and the annual state conference and called group conferences. Some vocational home economics teachers organized and taught evening school classes as a volunteer service to the women in their community.

An extensive evening school program was carried on in one center in the state with courses in maid service for cooks, maids doing general house work, and for nurse maids. Also, courses for homemakers in homemaking, clothing problems, and child development were offered. Several men were enrolled in the child development class, and it was ably taught by a social service worker. There

is an increasing demand for home economics classes for adults.

A few schools have added home economics departments each year and there are each year more applications for vocational home economics than can be approved within the funds available.

The State Supervisor of Home Economics Education cooperates with the State Agent for Negro Education in promoting and improving home economics education for girls and women.

### **Teacher Training**

The Florida Agricultural and Mechanical College is approved for teacher-training in home economics education. A five-room Home Management House was added in 1931-32. This gives the home economics trainees an opportunity to practice, under supervision, for eight weeks all phases of homemaking. Each trainee also has practice teaching under supervision, observing forty lessons and teaching thirty lessons.

The home economics majors have more than doubled in the past biennium in the regular and summer session enrollment.

In 1931-32 the Dean of the School of Home Economics, who is also the teacher-trainer, did some itinerant teacher-training, visiting teachers on the job to learn wherein the trainee may be better prepared for her job, as well as to learn problems in the field. The State and Federal vocational funds participate in the salary and travel for the teacher-trainer.

The statistical tables which follow will show the expenditure of funds, the locality of home economics programs, and other facts regarding day, part time, evening school and teacher-training programs in Florida.

## CHAPTER VIII

---

### CIVILIAN VOCATIONAL REHABILITATION

Enjoying the right to make his own living in spite of his handicap. Trained by the Rehabilitation Division of the Florida State Department of Public Instruction. Successfully operating his own shop.

The purpose of the vocational rehabilitation service conducted by the Department of Public Instruction is to provide vocational guidance, vocational training, and vocational adjustments needed by physically handicapped persons to enable them to engage in employment.

Persons who have suffered physical impairments by reason of disease, accident, or deformity and as a result of such impairment are seriously handicapped vocationally are eligible for this service. If after a careful personal study of a physically handicapped applicant it appears that he could be qualified by training to engage in employment, an individual training program is made for him. This training is provided where it can be found. Some persons are trained in existing public institutions, some in private institutions, some in commercial or trade establishments, some under skilled tutors, and some by correspondence. The Department does not maintain any institution of its own for training purposes; it employs institutions or qualified individuals to provide instruction. The Department pays for instructional expenses but does not pay for living maintenance or personal expenses of trainees.

The cost of the vocational rehabilitation service is borne by the Federal Government and the State with the assistance of local governments and individuals. Florida is one of forty-four states providing such a service. The case work is carried on by the State Supervisor of Vocational Rehabilitation with the cooperation of local officials and interested individuals.

The following paragraphs and tables show the activities of this division during the past two years.

At the end of the fiscal year, June 30, 1933, the live roll showed that 460 physically disabled persons were receiving vocational services. Eighty-five of these were in training for jobs; seventy-seven who had previously been trained were awaiting employment; fifty-eight were being followed up on jobs already received; and twenty-eight others had been classed as rehabilitated in satisfactory employment.

The average per case cost of rehabilitations was \$140.94 and the average monthly earnings were \$54.16. Thus it

will be seen that the income of these persons during the first year of employment greatly exceeds the money spent on them.

### Expenditures for fiscal year July 1, 1932 to June 30, 1933

1. Administrative .....		\$ 5,044.62
a. Salary of Supervisor .....	\$ 2,880.00	
b. Salary of Clerical Assistant .....	770.00	
c. Travel of Supervisor .....	1,265.03	
d. Communication .....	75.39	
e. Printing .....	18.50	
f. Supplies .....	35.70	
2. Case Production and Service .....		16,911.34
a. Tuition, Educational Institutions .....	\$ 4,662.57	
b. Tuition, Commercial and Industrial Establishments .....	3,202.41	
c. Tuition, Correspondence .....	2,905.03	
d. Tuition, Tutorial .....	258.70	
e. Instructional supplies and equipment .....	2,551.30	
f. Travel of trainees .....	1,045.65	
g. Artificial appliances .....	437.00	
h. Physical Examinations .....	43.00	
i. County Rehabilitation expenditures .....	1,805.68	
Total .....		\$21,955.96

### Sources of funds for Rehabilitation:

Federal Government .....	\$10,977.98	
State Government .....	8,987.50	
County Funds .....	1,895.68	
Private Contributions .....	184.80	
Total .....		\$21,955.96

At the end of the fiscal year, June 30, 1934, the live roll showed that 490 handicapped persons were enrolled for service. One hundred and twenty-three were receiving training or otherwise being qualified for employment. Eighty-three persons previously trained awaited employment. Seventy-eight persons were being followed up in employment. Thus the number of past trainees actually employed and fifty others were classed as rehabilitated through satisfactory employment. Thus the number of past trainees actually employed was greater than the number then in training.

The aggregate earnings of those persons rehabilitated during this fiscal year will, during the first year of their employment after rehabilitation, amount to much more than the total cost of the rehabilitation division during the year.

## DEPARTMENT OF PUBLIC INSTRUCTION

Expenditures for Fiscal Year July 1, 1933 to June 30, 1934

1. Administrative .....		\$ 5,010.40
a. Salary of Supervisor .....	\$ 2,880.00	
b. Salary of Clerical Assistant .....	775.00	
c. Travel of Supervisor .....	1,254.23	
d. Communication .....	7.09	
e. Printing .....	79.50	
f. Supplies, Administrative .....	14.58	
	<hr/>	
	\$ 5,010.40	
2. Case Production and Service .....		14,988.32
a. Tuition, Educational Institutions .....	4,911.32	
b. Tuition, Commercial and Industrial Establishments .....	1,401.02	
c. Tuition, Correspondence .....	335.70	
d. Tuition, Tutorial .....	2,494.05	
e. Instructional supplies and equipment .....	3,044.67	
f. Travel of trainees .....	377.19	
g. Artificial appliances .....	1,868.10	
h. Physical examinations .....	80.00	
i. Rehabilitation funds to reimburse County funds expended ..	476.27	
Total Expenditures .....		\$19,998.72
Sources of Funds for Rehabilitation:		
Federal Government .....	\$ 9,981.12	
State Government .....	7,485.00	
County Funds .....	1,768.32	
Private Contributions .....	763.78	
Total .....		\$19,998.72

The story of the rehabilitation of any of the physically handicapped persons is interesting, but the following stories will illustrate the value of rehabilitation services to disabled individuals.

F. C. had been a self supporting teacher in the public school system. He had married another teacher. They had two children. Illness impaired F. C.'s hearing so seriously that he was forced to give up his life's work. The burden of supporting the family fell on his wife who was forced to give up the care of her two small children and resume teaching.

The rehabilitation division provided F. C. with training in a vocation which he could follow in spite of his handicap. With the skill which he acquired, he was able to obtain employment in spite of poor business conditions. The ability to earn a living once more meant much to him and his children for meanwhile his overburdened wife had died.

Another interesting case is that of a young negro who had lost a limb and was unable to earn a living. Training in shoe repairing restored his earning capacity, and he recently employed his former instructor who had lost his own business.

This young lady, who travels in a wheel chair because of a severe attack of infantile paralysis, is now a capable stenographer. Her handicap does not keep her from doing good work and earning a living. Trained by the Rehabilitation Division.

Persons rehabilitated by this division suffered from many kinds of disabilities including loss of a limb, loss of both limbs, loss of an arm, blindness, deafness, weak heart, infantile paralysis, etc.

Various surveys which have been made in local communities indicate that there are 20,000 persons in Florida who are disabled because of disease, accident, or deformity. The State Supervisor of Vocational Rehabilitation believes that an appreciable per cent of this group could profit by rehabilitation services. However, the number now being served can not be increased without additional funds.

## CHAPTER IX

---

### SCHOOL BUILDINGS

The Division of School Building Service was made possible last fall through the generosity of the General Education Board. The personnel of the department reported for work on November 1, 1933, and this report presents the purposes of the department and covers all activities until July 1, 1934.

The purpose is to assist educational authorities to conserve resources by offering free consultant services concerning the erection of new buildings, the remodeling of old ones, and in the maintenance of all buildings and equipment.

The need for such a service is evident when one stops to realize the large proportion of school money which will be expended largely by rural trustees and board members who have had no previous experience in school building problems. When a building is erected it must of necessity serve a long period of time. If seriously defective in any way it is the public, teachers and pupils who suffer for the defects rather than those responsible for making them. To illustrate: an important special tax district bonded a second time within a few dollars of its limit in order to make an addition of several rooms to a well-planned, comparatively new building. The addition was placed so near to the old plant that several rooms in both buildings receive insufficient day-light. Besides the eye-strain inflicted on the children, the district has to pay for electric current to light the rooms properly. This additional expense was indefensible, but the building has been erected, and expenses must be met.

As society develops, the furnishing of proper educational opportunities becomes a more complex problem. Since Florida, along with the other states, has accepted education as a function of the state, and since it has a compulsory attendance law, it should provide a suitable

workshop for the public school children. Pupils should be housed in buildings hygienically correct, structurally safe, equipped with fire exits—buildings in which they may work without being unnecessarily exposed to insanitary conditions.

The State Board of Education should be given authority to establish school building standards and require that all construction plans involving one or more rooms be submitted for their approval. When public money is used without their approval the trustees or county board members should be held personally liable. Authority similar to this and enforced by competent officials will save taxpayers money by preventing unnecessary buildings, eliminating expensive building, avoiding structures built without thought of future additions, and by preventing the building of too large a plant anticipating future growth.

Recently this division was called to assist one of the largest rural schools in Florida to prepare plans for enlarging and repairing the building. Upon inspection termites were discovered in the timbers of the auditorium floor. This was due to a total lack of ventilation under this part of the building. The seats had to be removed, the entire floor torn out, areaways built and ventilators provided. The entire repair was due to poor, inexcusable planning. The money used for this project should have been added to an already limited instruction budget.

If all funds expended for operation, maintenance, capital outlay and debt service of school systems were placed in charge of professional workers, as is the instructional service, school budgets would be found in better shape, school teachers better paid, and the morale of our schools on a higher plane.

During the eight months of its service the School Building Division rendered the following services:

1. Made 174 inspections of building under construction.
2. Assisted in the selection of 29 sites for new buildings.
3. Advised with 20 county boards of public instruc-

tion during their monthly or called meetings relative to various building problems.

4. Visited 61 county superintendents of public instruction to explain the services of the School Building Division and discuss with them school building problems.

5. Either furnished sketches or had conferences with 26 communities concerning proposed new buildings not yet under construction.

6. Appeared on programs of 11 county, district, community or State educational meetings.

7. Recommended to 33 schools that toilet facilities be changed or improved to meet requirements of State Board of Health.

8. Investigated and recommended changes in heating systems of 7 schools.

9. Made safety inspections of 8 buildings.

10. Made building surveys in 14 communities, or assisted in the making of them.

11. Furnished plans for 21 new schools varying in size from one to six classrooms.

The total estimated value of alterations, additions, and cost of new buildings on which the Building Division worked amounted to three million, seven hundred and seventy-one thousand, eight hundred and ninety-seven dollars (\$3,771,897.). The greater per cent of the cost of these alterations, additions and new buildings was borne by various Federal agencies.

The School Building Division offers the following service:

1. Furnishes plans and specifications for buildings from one to four classrooms, and in unusual instances for six classrooms. We feel that this service will contribute to better planning of small schools where the county board can not afford the services of a capable architect.

2. Acts as consultant for any size school building, or building problem, this service being available to the designer of the building as well as to school officials.

3. Inspects all buildings and makes reports as to their safety.
4. Furnishes pictures, information, and assists in campaigns for new buildings.
5. Assists with heating and ventilating problems.
6. Furnishes information as to merits and costs of different sanitary toilet plans.
7. Assists in remodeling and modernizing old school buildings.
8. Studies with architects or county officials to determine building needs and estimates before calling for definite amounts in bond issues. Often amounts are arbitrarily set when they should be carefully estimated beforehand.
9. Selects school sites.
10. Suggests plans for home-made cabinet work for home economics, library and laboratory equipment.
11. Furnishes plans for gymnasiums, teachers' homes, and agricultural and vocational shops.

All services rendered by this department are free.

### RECOMMENDATIONS

1. During the school year of 1932-33 school authorities spent four tenths of one per cent of the value of all school buildings and equipment on their maintenance. Such a small expenditure for an investment representing \$69,785,463. is "penny wise and pound foolish." County boards of public instruction should provide more adequately for the maintenance of their school equipment.
2. The State Board of Education should be authorized to establish, and be given authority to enforce, minimum standards for buildings and equipment, with due regard for: economy of expenditure, dignity of design, utility of space, safety of physical and hygienic conditions.
3. For the construction of new school buildings involving six or more classrooms, and modernization of larger buildings, it is recommended that the county board

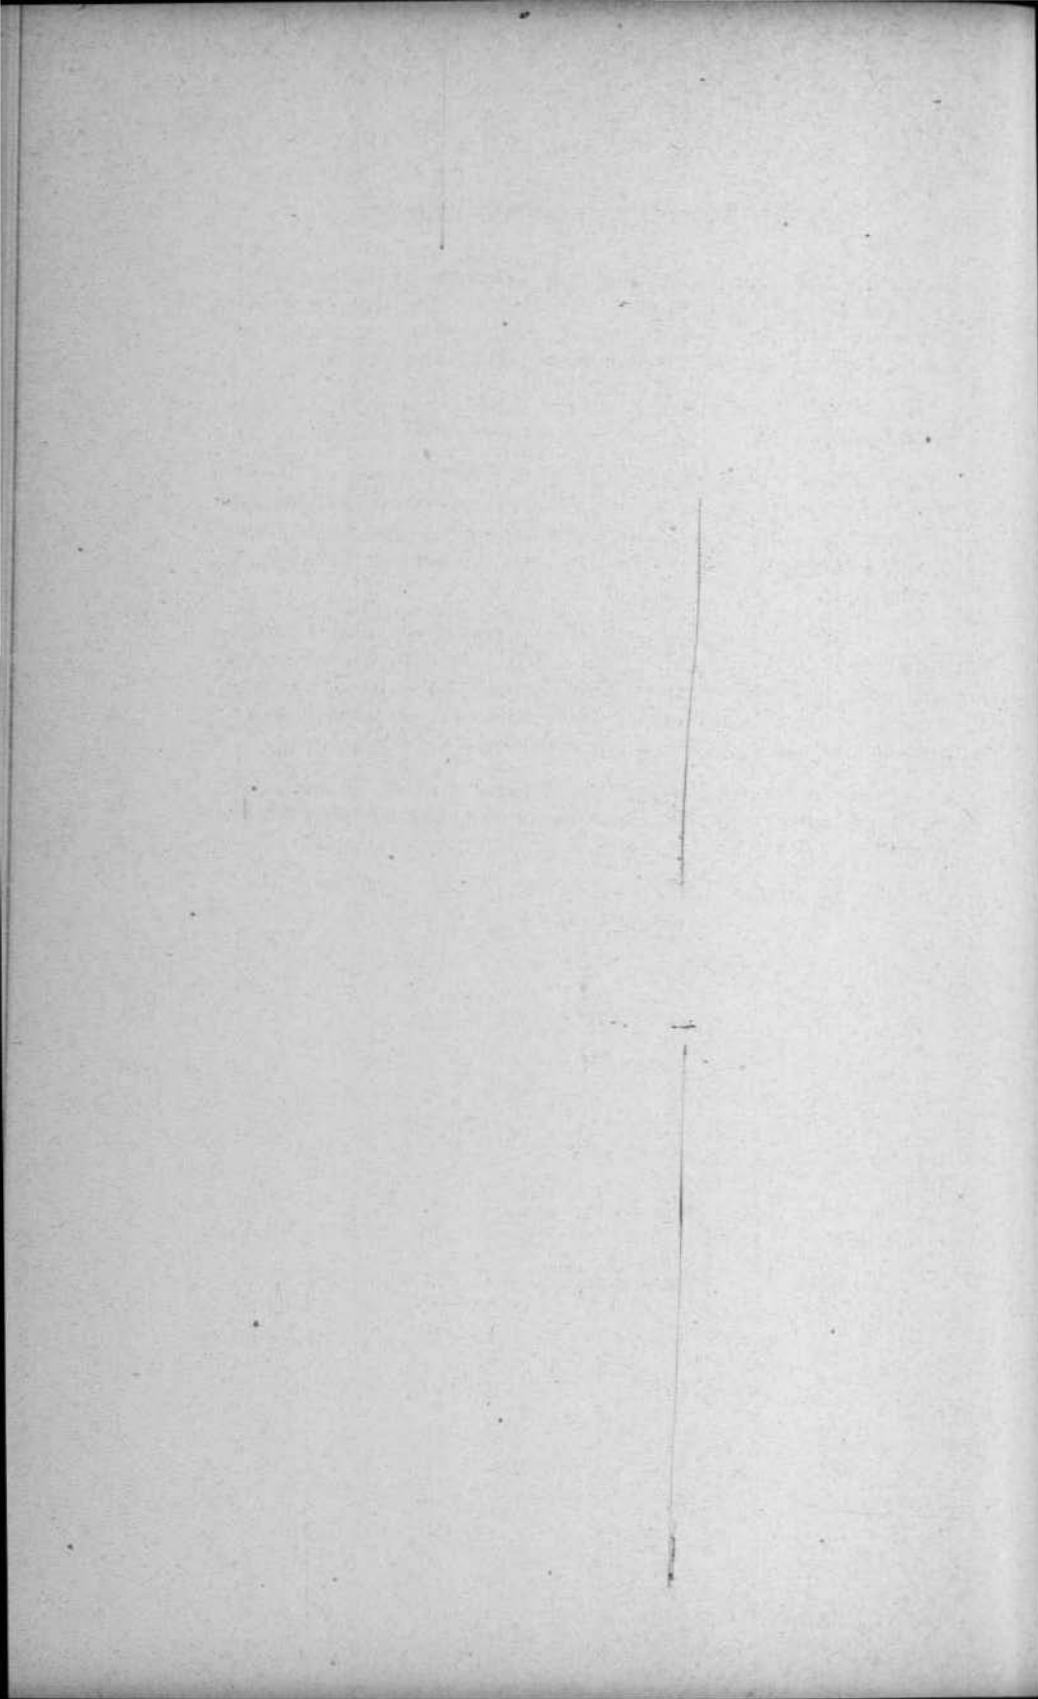

of public instruction employ the services of experienced architects of high repute. The School Building Service Division will be glad to make preliminary studies and sketches, and act as adviser throughout the program.

4. Some State agency should have authority to condemn public buildings that are structurally unsafe.

5. In a small school building, where the cost of a central heating system is prohibitive, we recommend the use of jacketed heaters. These should be provided with fresh air intakes, foul air extractors and means for furnishing humidity.

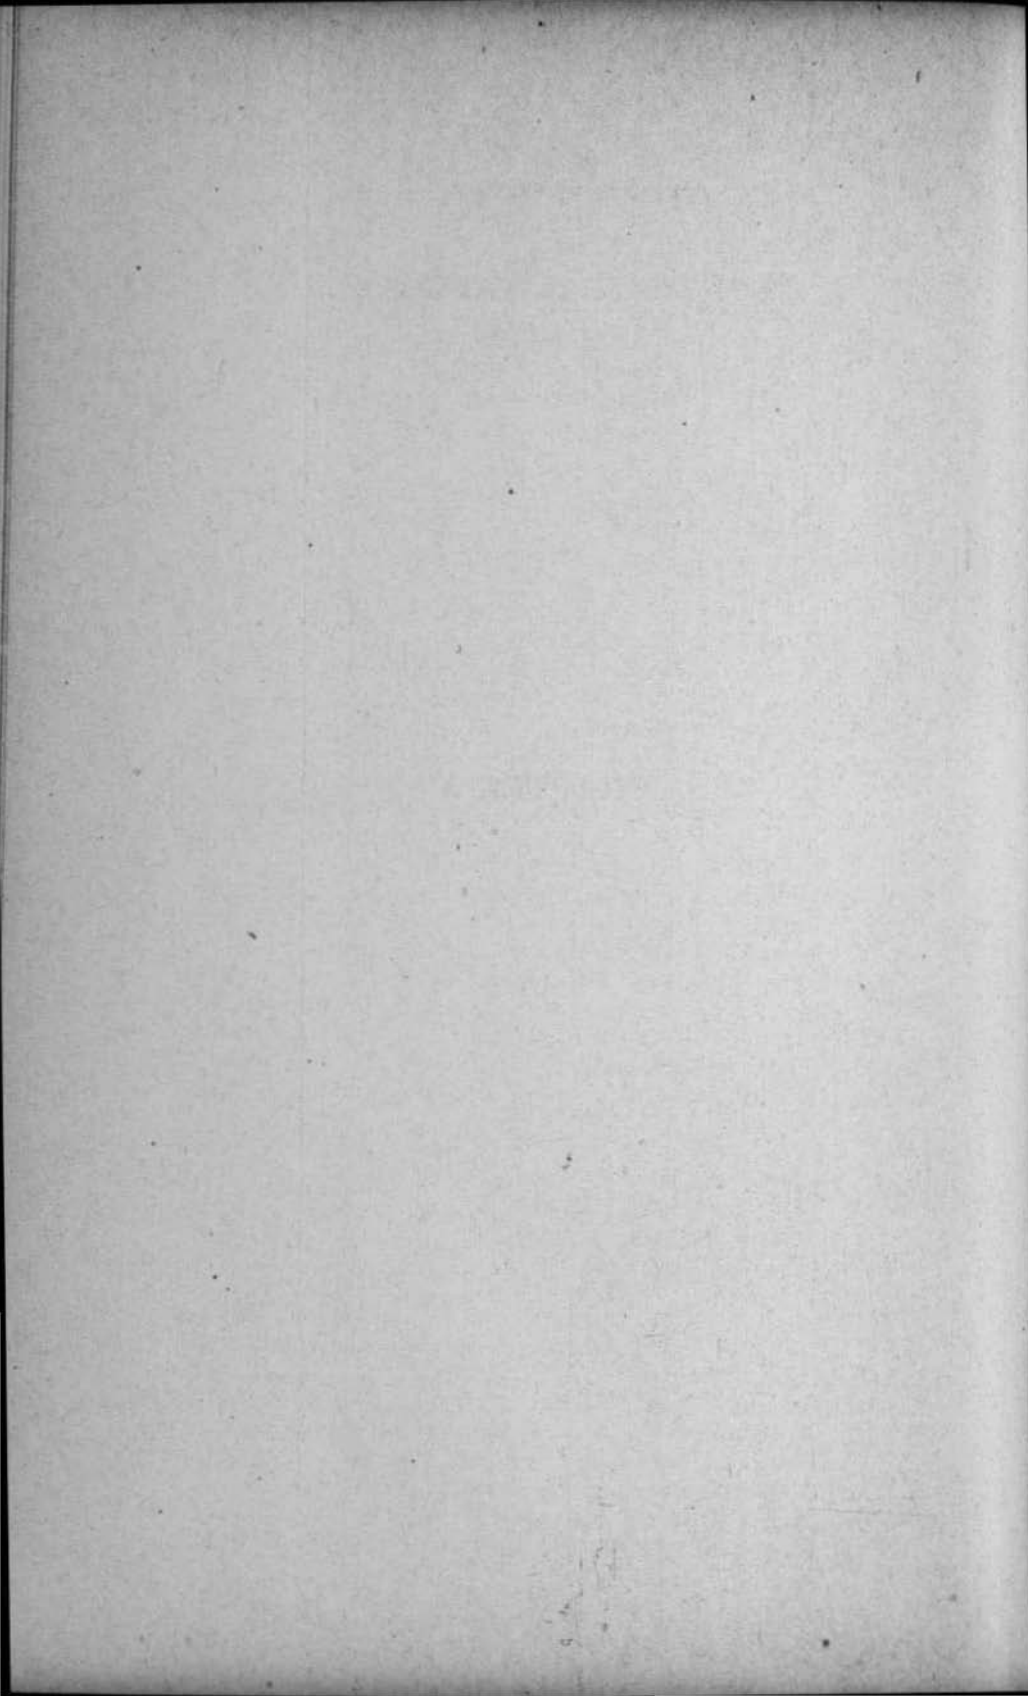

6. Probably the most universal defects of school buildings are leaky rooms. This fault can be overcome by building pitched roofs, discouraging the use of parapet walls, by buying good roof materials of a standard make, and by requiring a bond guaranteeing workmanship.

7. We recommend that incinerator toilets be installed in rural one-story school buildings of three or more classrooms.

### STATISTICAL TABLES

The following statistical tables covering the two fiscal years ending June 30, 1933 and June 30, 1934 were compiled from annual reports of county superintendents to the State Superintendent of Public Instruction. Summaries for both years are given on pages 254 and 358.

The tables for 1932-1933 are similar to those of the past few years. The statistics for 1933-1934, however, are somewhat different. This is due to the installation by the State Auditing Department of a uniform system of accounting in the offices of county superintendents, and a revision of annual report blanks to conform with the revised system.

Insofar as financial records are concerned, the various items given in the annual reports of the county superintendents to this Department correspond with similar items in the school budgets and to similar items reported to the State Comptroller. This, of course, insures more accurate reports from county superintendents, which in turn means more accurate statistics from this Department.

In past years, as well as in the years which this report covers, a comparison of the cash reported on hand at the close of a fiscal year with the amount reported on hand at the beginning of the next fiscal year, shows that in some counties these amounts vary. This is due in part to the system of accounting used and to the form of annual reports. In compiling statistics for 1933-1934, where a difference of this kind occurred in any county, an effort was made to ascertain the reason. It was found that in some counties the bank balance which included the warrants outstanding was reported, instead of the cash balance. Some counties reported money in closed banks as cash. Some did not include the cash in Bond Funds and Interest and Sinking Funds at the close of the fiscal year but did include these amounts in the new form of reports. It is hoped that with the new system of accounting now

in use, and the revised annual report forms, that these irregularities may be eliminated.

The new system of accounting requires that the cost of free textbooks furnished by the State be reported with the Teachers' Salary Fund under receipts from State sources. The cost of free books distributed to the various schools in a county is charged to Instruction, and the cost of the undistributed books is reported under Inventory of Stores and Free Textbooks at the close of the year. It will therefore be noted that the cost of free textbooks is included in Receipts and Expenditures for 1933-1934.

In the 1933-1934 tables the commissions paid to tax-collectors and assessors are included under Fixed Charges instead of General Control, as in former years.

Annual Reports from county superintendents show the average length of school term for 1933-1934 as being longer than that of 1932-1933, the average for the State being 164 days. This is due to the fact that many counties received Federal aid which made it possible for schools to run longer than in 1932-1933.

## SUMMARY OF STATISTICS—1932-1933

## RECEIPTS

## REVENUE RECEIPTS:

## State Funds:

One Mill Tax .....	\$ 364,258.94
Interest on Com. School Fund .....	165,237.53
Motor Vehicle License .....	4,543,810.46

XXV. Expenditures for High Schools (Grades 7-12) .....	437

## DEPARTMENT OF PUBLIC INSTRUCTION

SUMMARY OF STATISTICS—1933-1934  
NUMBER OF SCHOOLS

(Each Department is counted as a School)

WHITE		NEGRO	
Elementary (Grades 1-6) .....	1,164	Elementary (Grades 1-6) .....	884
Junior (Grades 7-9) .....	313	Junior (Grades 7-9) .....	74
Senior (Grades 10-12) .....	197	Senior (Grades 10-12) .....	31
Total .....	1,674	Total .....	989

## NUMBER OF POSITIONS FILLED

WHITE		NEGRO	
Kindergarten .....	18	Kindergarten .....	4
Elementary .....	5,192	Elementary .....	2,152
Junior .....	1,710	Junior .....	285
Senior .....	1,568	Senior .....	160
Total .....	8,488	Total .....	2,601

## AVERAGE LENGTH OF SCHOOL TERM

WHITE		NEGRO	
Elementary (Grades 1-6) .....	164 Days	Elementary (Grades 1-6) .....	160 Days
Junior (Grades 7-9) .....	166 Days	Junior (Grades 7-9) .....	163 Days
Senior (Grades 10-12) .....	167 Days	Senior (Grades 10-12) .....	164 Days
All White .....	165 Days	All Negro .....	160 Days
Average Length of Term, Both Races .....		164 Days	

## ENROLLMENT BY GRADES

	White	Negro	Total
Kindergarten .....	1,403	1,984	3,387
First Grade .....	38,972	29,929	68,901
Second Grade .....	29,204	15,385	44,589
Third Grade .....	29,317	13,717	43,034
Fourth Grade .....	28,359	12,050	40,409
Fifth Grade .....	27,573	9,723	37,296
Sixth Grade .....	25,549	7,942	33,491
Seventh Grade .....	24,338	5,043	29,381
Eighth Grade .....	20,499	3,558	24,057
Ninth Grade .....	17,580	2,242	19,822
Tenth Grade .....	13,827	1,465	15,292
Eleventh Grade .....	11,204	1,056	12,260
Twelfth Grade .....	9,804	787	10,591
Total .....	277,629	104,881	382,510

## AVERAGE DAILY ATTENDANCE

WHITE		NEGRO	
Grades 1-6 .....	138,393	Grades 1-6 .....	70,723
Grades 7-9 .....	49,429	Grades 7-9 .....	8,575
Grades 10-12 .....	29,873	Grades 10-12 .....	2,831
Total .....	217,695	Total .....	82,129

Total Average Attendance, Both Races.....299,824

Per Cent of Enrollment in Average Attendance:

White .....	78.4%
Negro .....	78.3%

## TRANSPORTATION OF PUPILS

WHITE		NEGRO	
Number Transported .....	61,701	Number Transported .....	5,767
Cost of Transportation ....	\$957,061.29	Cost of Transportation ....	\$ 20,684.38

## FREE TEXTBOOKS

(Furnished by State to Pupils of First Six Grades)

Enrollment of First Six Grades .....	271,107
*Cost of Free Textbooks .....	\$205,131.00
Average Cost per Pupil .....	.75

\*In addition to the cost of Free Textbooks, \$343.10 was spent for incidental expenses by the State Department of Public Instruction.

## INSTRUCTION PERSONNEL

WHITE		NEGRO	
Supervisors, Elementary .....	4	Supervisors, Elementary .....	2
